Gender equality, heritage and creativity UNESCO,2014-10-13 Initiated by the Culture Sector of UNESCO, the report draws together existing research, policies, case studies and statistics on gender equality and women's empowerment in culture provided by the UN Special Rapporteur in the field of cultural rights, government representatives, international research groups and think-tanks, academia, artists and heritage professionals. It includes recommendations for governments, decision-makers and the international community, within the fields of creativity and heritage. Annex contains essay 'Gender and culture: the statistical perspective' by Lydia Deloumeaux.

The Heavy Elements J. E. Fergusson,1990 This text provides a broad survey of the ten heavier elements of the p-block, which have a number of features in common as well as displaying periodic trends. Full comprehension of the chemistry of the elements is necessary before complete understanding of environmental and health effects is possible. In many texts, however, basic chemistry is avoided as too complex or uninteresting. The author's approach in this case is to use the disciplines of health and environmental science to enhance understanding of the chemistry and to provide students with an integrated approach to the influence of the elements on the world. Information is provided on concentrations, sources and speciation of the heavy elements and their effects on the health of human beings. The text is intended to stimulate students to investigate further aspects of the heavy elements, and contribute to this young but rapidly growing field.

Sakuteiki Jiro Takei,Marc P. Keane,2011-04-11 Learn the art of Japanese gardening with this classic, fascinating text. The Sakuteiki, or Records of Garden Making, was written nearly one thousand years ago. It is the oldest existing text on Japanese gardening--or any kind of gardening--in the world. In this edition of the Sakuteiki, the authors provide an English-language translation of this classic work and an introduction to the cultural and historical context that led to the development of Japanese gardening. Central to this explanation is an understanding of the sacred importance of stones in Japanese culture and Japanese garden design. Written by a Japanese court noble during the Heian period (794-1184), the

Sakuteiki includes both technical advice on gardening--much of which is still followed in today's Japanese gardens--and an examination of the four central threads of allegorical meaning, which were integral features of Heian-era garden design. For those seeking inspiration to build a rock garden or just better understand the Japanese stone garden, the Sakuteiki is an enduring classic.

Coastal Fluxes in the Anthropocene Christopher J. Crossland, Hartwig H. Kremer, Han J. Lindeboom, Janet I. Marshall Crossland, Martin D.A. Le Tissier, 2005-10-24 This book synthesizes knowledge of coastal and riverine material fluxes, biogeochemical processes and indications of change, both natural, and increasingly human-initiated. Here, the authors assess coastal flux in the past and present, and in future under the International Geosphere-Biosphere Programme (IGBP), the International Human Dimensions Programme on Global Environmental Change (IHDP) and the LOICZ II (Land-Ocean Interactions in the Coastal Zone) Project.

Practising the Good Life Kate Torkington, Inês David, João Sardinha, 2015 This edited collection adds to the growing body of research on lifestyle migration with empirically grounded explorations focusing on a wide range of practices involved in living â ~the good lifeâ (TM). The volume brings together a variety of socio-geographical contextsâ from Swedish â ~lifestyle moversâ (TM) in Malta, retired Britons and Germans in Spain, and seekers of the â ~rural idyllâ (TM) in the Iberian Peninsula, to expats in Nepal, North Americans in Ecuador and â ~utopianâ (TM) lifestyle migrants in Patagoniaâ to provide a broad spectrum of studies that provide insights into how the practices of lifestyle migration are (re-)produced and performed. Adopting a variety of methodological approaches, the contributions also reflect the interdisciplinary nature of current research into migration, with groundings in sociology, anthropology, human geography, cultural studies and linguistics. The practice-based approach taken in this book explores a range of aspects and issues surrounding lifestyle-oriented mobilities by considering how these mobilities materialise in peopleâ (TM)s everyday engagements, imaginations, identities, institutional articulations and international dynamics. The practices that are highlighted include: mobility practices; community-building practices, particularly as enacted in the new â ~cultural arenasâ (TM) provided by destination places; identity practices, including racialized practices and on-line practices; language practices; home-ownership practices, practices of home-making and belonging; alternative lifestyle and â ~spiritualâ (TM) practices; active ageing practices; leisure and work-related practices in rural contexts; and the (often mediated) practices sustaining what can be called a â ~lifestyle migration industryâ (TM).

Practical Food Safety Rajeev Bhat, Vicente M. Gómez-López, 2014-06-23 The past few years have witnessed an upsurge in incidences relating to food safety issues, which are all attributed to different factors. Today, with the increase in knowledge and available databases on food safety issues, the world is witnessing tremendous efforts towards the development of new, economical and environmentally-friendly techniques for maintaining the quality of perishable foods and

agro-based commodities. The intensification of food safety concerns reflects a major global awareness of foods in world trade. Several recommendations have been put forward by various world governing bodies and committees to solve food safety issues, which are all mainly targeted at benefiting consumers. In addition, economic losses and instability to a particular nation or region caused by food safety issues can be huge. Various 'non-dependent' risk factors can be involved with regard to food safety in a wide range of food commodities such as fresh fruits, vegetables, seafood, poultry, meat and meat products. Additionally, food safety issues involves a wide array of issues including processed foods, packaging, post-harvest preservation, microbial growth and spoilage, food poisoning, handling at the manufacturing units, food additives, presence of banned chemicals and drugs, and more. Rapid change in climatic conditions is also playing a pivotal role with regard to food safety issues, and increasing the anxiety about our ability to feed the world safely. *Practical Food Safety: Contemporary Issues and Future Directions* takes a multi-faceted approach to the subject of food safety, covering various aspects ranging from microbiological to chemical issues, and from basic knowledge to future perspectives. This is a book exclusively designed to simultaneously encourage consideration of the present knowledge and future possibilities of food safety. This book also covers the classic topics required for all books on food safety, and encompasses the most recent updates in the field. Leading researchers have addressed new issues and have put forth novel research findings that will affect the world in the future, and suggesting how these should be faced. This book will be useful for researchers engaged in the field of food science and food safety, food industry personnel engaged in safety aspects, and governmental and non-governmental agencies involved in establishing guidelines towards establishing safety measures for food and agricultural commodities.

Connectivity Conservation Kevin R. Crooks, M. Sanjayan, 2006-11-02 One of the biggest threats to the survival of many plant and animal species is the destruction or fragmentation of their natural habitats. The conservation of landscape connections, where animals, plants, and ecological processes can move freely from one habitat to another, is therefore an essential part of any new conservation or environmental protection plan. In practice, however, maintaining, creating, and protecting connectivity in our increasingly dissected world is a daunting challenge. This fascinating volume provides a synthesis on the current status and literature of connectivity conservation research and implementation. It shows the challenges involved in applying existing knowledge to real-world examples and highlights areas in need of further study. Containing contributions from leading scientists and practitioners, this topical and thought-provoking volume will be essential reading for graduate students, researchers, and practitioners working in conservation biology and natural resource management.

City Requiem, Calcutta Ananya Roy, 2003 Housing developments emerge amid the paddy fields on the fringes of Calcutta; overflowing trains carry peasant women to informal urban labor markets in a daily commute against hunger; land is settled and claimed in a complex choreography of squatting and evictions: such, Ananya Roy contends, are the distinctive spaces of a communism for the new millennium -- where, at a moment of liberalization, the hegemony of poverty is quietly reproduced. An ethnography of urban development in Calcutta, Roy's book explores the dynamics of class and gender in the persistence of poverty. *City Requiem, Calcutta* emphasizes how gender itself is spatialized, and how gender relations are negotiated within the geopolitics of modernity and through the everyday practices of territory. Thus Roy shows how urban developmentalism, in its populist guise, reproduces the relations of masculinist patronage, and, in its entrepreneurial guise, seeks to reclaim a bourgeois Calcutta, gentlemanly in its nostalgias. In doing so, her work expands the field of poverty studies by showing how a politics of poverty is also a poverty of knowledge, a construction and management of social and spatial categories.

Paris, Capital of Modernity David Harvey, 2004-06-01 Collecting David Harvey's finest work on Paris during the second empire, *Paris, Capital of Modernity* offers brilliant insights ranging from the birth of consumerist spectacle on the Parisian boulevards, the creative visions of Balzac, Baudelaire and Zola, and the reactionary cultural politics of the bombastic Sacre Couer. The book is heavily illustrated and includes a number drawings, portraits and cartoons by Daumier, one of the greatest political caricaturists of the nineteenth century.

I Speak of the City Mauricio Tenorio-Trillo, 2015-04-22 In this dazzling multidisciplinary tour of Mexico City, Mauricio Tenorio-Trillo focuses on the period 1880 to 1940, the decisive decades that shaped the city into what it is today. Through a kaleidoscope of expository forms, *I Speak of the City* connects the realms of literature, architecture, music, popular language, art, and public health to investigate the city in a variety of contexts: as a living history textbook, as an expression of the state,

as a modernist capital, as a laboratory, and as language. Tenorio's formal imagination allows the reader to revel in the free-flowing richness of his narratives, opening startling new vistas onto the urban experience. From art to city planning, from epidemiology to poetry, this book challenges the conventional wisdom about both Mexico City and the turn-of-the-century world to which it belonged. And by engaging directly with the rise of modernism and the cultural experiences of such personalities as Hart Crane, Mina Loy, and Diego Rivera, *I Speak of the City* will find an enthusiastic audience across the disciplines.

What is Sociology? Norbert Elias, 1978 *What is Sociology?* presents in concise and provocative form the major ideas of a seminal thinker whose work--spanning more than four decades--is only now gaining the recognition here it has long had in Germany and France. Unlike other post-war sociologists, Norbert Elias has always held the concept of historical development among his central concerns; his dynamic theories of the evolution of modern man have remedied the historical and epistemological shortcomings of structuralism and ethno-methodology. *What is Sociology?* refines the arguments that were first found in Elias' massive work on the civilizing process, in which he formulated his major assertions about the interdependence of the making of modern man and modern society. It is Elias' contention that changes in personality structure--embodied in phenomena ranging from table manners and hygiene habits to rites of punishment and courtly love--inevitably reflect and mould patterns of control generated by new political and social institutions. Elias' rejection of a dichotomy between individual and society, and his use of psychoanalysis, political theory, and social history, help restore a fullness of resource to sociology.

The Book of Chilam Balam of Chumayel Ralph Loveland Roys,

The Historical Archaeology of Buenos Aires Daniel Schávelzon, 2005-11-25 A discussion of the historical archaeology of one of the largest cities in the world following four centuries of marginal positioning in regard to empires, trade routes, and the production and accumulation of wealth. The author describes how Buenos Aires came to achieve its current status as a major urban metropolis through an analysis of settlement patterns, architecture, the lifestyle of its residents, and the access to commodities of different social groups.

Small Business Guide to the Food and Drug Administration (FDA) U. S. Food U.S. Food and Drug Administration, U. S. Small U.S. Small Business Administration, 2014-09-04 The purpose of this guide is to help small businesses - usually those with fewer than 500 employees - successfully navigate the realm of regulatory measures with which the U.S. Food and Drug Administration (FDA or the Agency) protects and promotes the health of the American public. Familiarity with FDA requirements is very important for a small firm that manufactures or plans to manufacture, sell, warehouse, transport, or import any of the thousands of FDA regulated products. To reach the U.S. interstate market, these products must comply with the applicable laws and the science-based public health rules developed and enforced by FDA. Although this obligation is

routinely fulfilled by hundreds of thousands of American businesses, FDA is aware that for a small firm it can present a challenge. The Agency's responsibilities are defined in some 200 federal laws, and the resulting requirements, which can be complex, cover hundreds of pages in the Code of Federal Regulations. To find their way in this extensive domain of requirements, small and start-up businesses are likely to need expert assistance. The purpose of this guide is to help satisfy this need. Chapters I-IV provide an overview of FDA's responsibilities and operations and outline the main areas where small firms are most likely to come in contact with the Agency. Chapter V provides links to information that small businesses most frequently request from FDA's product centers and the Agency's Office of Regulatory Affairs. Chapter VI lists the Agency's offices and individuals who are ready to help small firms resolve their regulatory problems. This guide is designed to help make the small firms' contacts with FDA as efficient and productive as possible. We present this document as a blueprint that firms can follow to achieve their business aims while helping FDA accomplish its public health mission.
