The Renegotiations of Public Private Partnerships in Transportation Carlos Oliveira Cruz, Joaquim Miranda Sarmiento, 2021 This book provides a theoretical basis for understanding the phenomenon of renegotiations in Public Private Partnerships (PPPs). It analyzes the case of transport projects, and provides empirical evidence from a variety of real-world projects. What drives renegotiations? Why are some projects more likely to be renegotiated than others? What are the outcomes? How can we improve the performance of renegotiation processes? These questions form the core of discussion in this book. PPPs are a procurement model for the delivery of infrastructure and public services that have experienced significant growth over the last three decades, particularly in terms of the development of transportation projects. The empirical evidence suggests that most PPP projects are inevitably renegotiated, i.e., the original contract needs to be adapted to new and unforeseen circumstances. The impacts of these changes on the welfare of the respective stakeholders are frequently asymmetric. Most academic research and professional guidelines are focused on PPP contract design and preparation of the procurement process, and very little has been published on the management and, mainly, the process of renegotiating that will - in all likelihood - occur. This book fills this gap in the academic discussion. Several country-based analyses and case studies from Europe and the Americas provide the reader with practical applications of the theory. .

The Years of Alienation in Italy Alessandra Diazzi, Alvis Sforza Tarabochia, 2019 The Years of Alienation in Italy offers an interdisciplinary overview of the socio-political, psychological, philosophical, and cultural meanings that the notion of alienation took on in Italy between the 1960s and the 1970s. It addresses alienation as a social condition of estrangement, caused by the capitalist system, a pathological state of the mind and an ontological condition of subjectivity. Contributors to the edited volume explore the pervasive influence this multifarious concept had on literature, cinema, architecture, and photography in Italy. The collection also theoretically reassesses the notion of alienation from a novel perspective, employing Italy as a paradigmatic case study in its pioneering role in the revolution of mental health care and factory work during these two decades. Alessandra Diazzi is Lecturer in Italian at the University of Manchester, UK. Her work focuses primarily on the reception of psychoanalysis in Italian culture, with a particular focus on the relationship between psychoanalysis and impegno in Italy. She has published articles on contemporary Italian literature and cinema. Alvis Sforza Tarabochia is Lecturer in Italian at the University of Kent, UK. His research encompasses visual culture and psychiatry in Italy. He has

published a monograph on the theoretical implications of Basaglia's thought, as well as articles on Italian literature, biopolitics, visual culture and psychoanalysis.

Modern Italian Grammar Anna Proudfoot, Francesco Cardo, 2005 This new edition of the Modern Italian Grammar is an innovative reference guide to Italian, combining traditional and function-based grammar in a single volume. With a strong emphasis on contemporary usage, all grammar points and functions are richly illustrated with examples. Implementing feedback from users of the first edition, this text includes clearer explanations, as well as a greater emphasis on areas of particular difficulty for learners of Italian. Divided into two sections, the book covers: traditional grammatical categories such as word order, nouns, verbs and adjectives language functions and notions such as giving and seeking information, describing processes and results, and expressing likes, dislikes and preferences. This is the ideal reference grammar for learners of Italian at all levels, from beginner to advanced. No prior knowledge of grammatical terminology is needed and a glossary of grammatical terms is provided. This Grammar is complemented by the Modern Italian Grammar Workbook Second Edition which features related exercises and activities.

Food and Foodways in Italy from 1861 to the Present Emanuela Scarpellini, 2016-04-29 Despite being a universal experience, eating occurs with remarkable variety across time and place: not only do we not eat the same things, but the related technologies, rituals, and even the timing are in constant flux. This lively and innovative history paints a fresco of the Italian nation by looking at its storied relationship to food.

Benchmarking and Regulation in Transport Chris Nash, Ginevra Bruzzzone, 2021-09-28 This insightful book provides readers with an in-depth discussion of the use of benchmarking in regulation in the European transport sector. It argues that benchmarking is invaluable to regulators, particularly in the transport sector where the pressures of competition in - or for - the market are often absent. Written by a range of expert contributors, chapters offer an analysis of methodology, data requirements as well as practical examples of the use of benchmarking in the main transport modes (such as road, rail, seaports, airports and local public transport). Utilising illuminating case studies, the book also reviews the importance of benchmarking in the application of European competition law and considers the issue of obtaining appropriate and reliable data to achieve this. Benchmarking and Regulation in Transport will be an essential read for researchers, scholars and students in the fields of economic regulation, governance, transport economics and transport law. It will also be useful for policymakers and regulators who wish to further their understanding of the benefits of benchmarking in an efficiency-enhancing public policy strategy, especially within transport infrastructure.

Causes and Deterrents of Transportation Accidents Peter Loeb, Wayne K. Talley, Thomas J. Zlatoper, 1994-09-29 This

book examines causes and deterrents of transportation accidents by mode--automobiles, truck, air, recreational boating, commercial vessels and railroads--with the focus on accidents in the U.S. The examination enhances our understanding for developing effective multimodal public policies for improving transportation safety. The discussion reveals that the primary cause of accidents in one mode may not be the primary cause in another mode and equally that an effective deterrent for improving safety in one mode may not be an effective deterrent for another mode. The book will be of interest to policy makers and investigators of transportation safety. The book consists of nine chapters. Following the Introduction chapter, possible causes of highway accidents--driver, vehicle, and highway characteristics--are examined in Chapter 2 along with economic and environmental factors. Chapter 3 then discusses the effectiveness of various deterrent policies--motor vehicle inspection, the minimum legal drinking age, the speed limit, and seat belt laws--for auto accidents, as well as the effects of vehicle speed and speed variance on these accidents. This is followed by a discussion of causes and deterrents of truck accidents in Chapter 4. Chapter 5 considers air accidents, discussing the role of economic deregulation and type of air carrier. Chapter 6 addresses recreational boating accidents, with particular attention given to alcohol involvement in these accidents. Chapter 7 examines commercial vessel accidents with a discussion of safety standards and enforcement. Chapter 8 considers rail accidents, with particular attention given to the effects of deregulation. The final chapter summarizes lessons learned from the previous chapters for improving transportation safety across modes, i.e., for reducing transportation accidents, accident risk, and accident severity.

Public Private Partnerships Robert M. Clark, Simon Hakim, 2020-11-04 This book discusses Public-Private Partnerships (PPPs) and their potential to protect and maintain critical infrastructure in a variety of global governmental settings. Critical infrastructure is defined as essential services that underpin and support the backbone of a nation's economy, security, and health. These services include the power used by homes and businesses, drinking water, transportation, stores and shops, and communications. As governmental budgets dwindle, the maintenance of critical infrastructure and the delivery of its related services are often strained. PPPs have the potential to fill the void between government accounting and capital budgeting. This volume provides a survey of PPPs in critical infrastructure, combining theory and case studies to provide a comprehensive view of possible applications. Written by a diverse group of international experts, the chapters detail PPPs across industries such as transportation, social infrastructure, healthcare, emergency services, and water across municipalities from the US to New Zealand to Hong Kong. Chapters discuss objectives and legal requirements associated with PPPs, the potential advantages and limitations of PPPs, and provide guidance as to how to structure a successful PPP for infrastructure investment. This book is of interest to researchers studying public administration, public finance, and infrastructure as well as practitioners and decision makers interested in instituting PPPs in their communities.

Financial sector taxation [Anonymus AC08741538], 2010 The global economic and financial crisis has created important

needs for fiscal consolidation. This document analyses potential instruments to raise additional tax revenues from the financial sector. The first section reviews the current policy objectives related to the taxation of the financial sector. The second section sheds some light on the current tax treatment of the financial sector. The third section discusses potential tax instruments to reach the goals. The fourth and fifth section respectively assess the advantages and drawbacks of a Financial Transaction Tax and a Financial Activities Tax.--Editor.

The Consumer Society Jean Baudrillard,2016-12-13 Jean Baudrillard's classic text was one of the first to focus on the process and meaning of consumption in contemporary culture. Originally published in 1970, the book makes a vital contribution to current debates on consumption. The book includes Baudrillard's most organized discussion of mass media culture, the meaning of leisure, and anomie in affluent society. A chapter on the body demonstrates Baudrillard's extraordinary prescience for flagging vital subjects in contemporary culture long before others. This English translation begins with a new introductory essay.

Law, Corporate Governance and Accounting Victoria Krivogorsky,2011-04-26 The growing internationalization of markets, the relaxation of constraints on capital flows between countries, and the creation of different economic unions -- the European Union in particular -- initiated the flow of capital, goods, and services across national borders, growth and diffusion of shareholding, and increased merger activity among the world's largest stock exchanges. These changes have stimulated an interest in understanding developments in accounting and corporate governance in a newly qualitative way. Law, Corporate Governance, and Accounting sets out a framework for the analysis of institutional environments as the interconnected key tools of modern public corporations. Along with examining latest developments in the integrated formal structures for the formulation of international accounting principles, analyzing new accounting regulations and the extrapolating on the lessons that can be learned from the harmonization of accounting principles in Europe, this monograph provides the analyses of the convergence in both auditing and corporate governance as well as US perspective on IFRS adoption.

The Urban Question Manuel Castells,1977 A review of the original French edition of this book in the American Journal of Sociology hailed it as the most finished product yet to emerge from the new (Marxist) school of French urban sociology... The aim of the book is nothing less than to reconceptualize the field of urban sociology. It is carried out in two stages: a critique of the literature of urban sociology (and urbanization) and an attempt to lay the Marxist bases for a reconstructed urban sociology. The problems facing the world's cities, whether problems of development or of decay, cannot be solved until they have been diagnosed. The race riots in Detroit, the shantytowns of Paris, the financial crisis of New York must not be seen in isolation. The mushrooming cities of the third world, demolition and urban sprawl at home are located in a network of economics, social welfare and power politics, and the decisions we are called upon to make elude us in a fog of ideology. This brilliant exposition of the function of the city in social, economic and symbolic terms illuminates the creation and structuring of space by action administrative, productive and more immediately human. The interaction of environment and life-style, the complex of market forces and state policy against a background of traditional social practice is scrutinized with the aim of establishing concepts and research methods that will enable us to come to grips with the cities themselves and the way in which we view them. Castells draws on urban renewal in Paris, the English New Towns, the American megalopolis for concrete data in his empirical and theoretical investigation. In this English edition, a new Part V has been added on urban development in America. The chapters on the pobladores in Chile and the struggle of the FRAP in Quebec have been greatly extended and an Afterword traces the development of research in the past five years. -- Amazon.com.
