**Modern Studies in Property Law, Volume 11** Sue Farran, Russell Hewitson, Adam Ramshaw, 2021-07-29 What are the contemporary challenges faced by property law as we enter the 2nd decade of the 21st century? This collection brings together the research and perspectives of an international body of academics and practitioners to consider these challenges and how even familiar topics must develop to meet new demands and developments. As with previous books in the Modern Studies in Property Law series, this volume adopts a broad approach to topics encompassed by 'property law' in the firm belief that the boundaries that divide are shadowy at best and constantly moving in the endeavour to keep up with what is 'modern'. This collection looks at 5 themes: - Comparative perspectives, including a chapter on grazing and cropping rights in Northern Ireland, and analysis of the anomalies of the English trust law as seen from a civil law perspective; - Taking and alienating property, including a chapter on bankruptcy and the family home; - Modern dilemmas, including chapters on trusts in virtual currency and on smart homes; - Old chestnuts - new challenges, including analysis of the mortgage law reform in Scotland and a chapter on the ouster principle in common law jurisdictions; and - Wills, death and other morbid topics, with chapters on English succession law and the role of knowledge and approval in retrospective assessments of capacity. Unfortunately, the COVID-19 pandemic prevented the 13th biennial conference being held in 2020 as planned but despite this, the authors and co-editors persevered to produce this interesting and diverse collection.

**Business Law** Nickolas James, 2024-10-28 Designed specifically for business students, James' Business Law, 7th Edition provides a comprehensive introduction to the fundamentals of business law. Tailored to accommodate the initial encounter with legal principles for business students, this textbook offers a clear and accessible pathway into the realm of law. Unlike traditional texts from leading legal publishers, Business Law, 7th Edition prioritizes a practical approach, emphasizing real-world applications over doctrinal intricacies. By demystifying complex legal concepts and presenting them within a business-oriented framework, this textbook equips students with the necessary foundation to navigate the legal landscape with confidence.

Professional Liability and Property Transactions Sharon Christensen, W. D. Duncan, 2004 This book examines in detail the principles underpinning professional liability both at common law (tort and contract) and by reason of statute (Trade Practices Act and Fair Trading Acts) in the context of property professionals. It includes comprehensive coverage of the Civil

Liability Acts. The early chapters deal with the sources of professional liability. They include an analysis of remedies for breach of professional obligations generally and of procedural issues, such as limitation of actions, expert evidence, apportionment and contributory negligence in the setting of professional liability. The heart of the book is original and accessible material on the measure of damages as it relates to the liability of the various professionals who become involved in property transactions. There are further chapters on the liability of lenders and local authorities as organisations commonly involved. It is an essential reference for any barrister, solicitor or other professional directly or indirectly involved in litigation in this area, as well as property lawyers. With a Foreword by The Hon Justice Ian Callinan. For more detailed information about the book's purpose and structure, please read the extract from the Preface, below.

**Consumer Law and Socioeconomic Development** Claudia Lima Marques, Dan Wei, 2017-07-14 This book reflects the research output of the Committee on the International Protection of Consumers of the International Law Association (ILA). The Committee was created in 2008, with a mandate to study the role of public and private law to protect consumers, review UN Guidelines, and to model laws, international treaties and national legislations concerning protection and consumer redress. It has been accepted to act as an observer not only when the UNCTAD was updating its guidelines, but also at the Hague Conference on Private International Law. The book includes the contributions of various Committee members in the past few years and is a result of the cooperation between the Committee members and experts from Australia, Brazil, Canada and China. It is divided into three parts: the first part addresses trends and challenges in international protection of consumers, while the second part focuses on financial crises and consumer protection and the third part examines national and regional consumer law issues.

*The Meaning of "enterprise", "business" and "business Profits" Under Tax Treaties and EU Tax Law* Guglielmo Maisto, 2011 The Meaning of Enterprise, Business and Business Profits under Tax Treaties and EU Tax Law, comprising the proceedings and working documents of an annual seminar held in Milan in November 2010, provides an in-depth analysis of

the meaning of these three essential concepts in relevant tax treaties and law. The analysis starts from an EU tax law perspective, with a particular emphasis on the European Directives. The above concepts are then considered from domestic tax law viewpoints. The book then moves to tax treaty law. Most notably, an examination of the history and interpretation of the concepts of enterprise, business and business profits is presented, starting from the works of the League of Nations to the current OECD Model Tax Convention. Next, specific tax treaty issues are considered. In particular, the controversial issues concerning the interpretation of the notions of enterprise and enterprise of a Contracting State are discussed. Also, the concepts of profits and business profits are thoroughly reviewed. The concept of enterprise in the context of the non-discrimination clause laid down by Art. 24 of the OECD Model Tax Convention is then examined. Individual country surveys provide an in-depth analysis of the aforementioned concepts and issues from a national viewpoint in selected European and North American jurisdictions, as well as in Australia and Japan. The book concludes with a round-table discussion among some of the most renowned international tax scholars on the desirability to change the OECD Model Tax Convention and its Commentaries. This book is essential reading for all those dealing with issues of taxation of enterprises engaged in cross-border activities and can be considered a new cornerstone in the subject matter.--Publisher's website

**Sale of Businesses in Australia** S. A. Christensen, William David Duncan, 2009 This second edition of *Sale of Businesses in Australia* concentrates on the sale of small businesses trading as individuals or in partnership under the standard Sales of Business contracts promulgated by the various Law Societies and Real Estate Institutes. Several chapters also apply to the sale of businesses generally. Topics covered include: matters relating to the typical transaction: stock in trade, goodwill, plant and fixtures; additional matters such as intellectual property, business names, and the transfer of business leases; special contract provisions, including restraint of trade and employee provisions, and other special conditions commonly found in contracts; taxation implications of the sale; time stipulations; obligations on completion; disclosure obligations; remedies for commonly encountered types of breach by either party. The book serves as an ideal reference point for the busy legal practitioner involved in advising upon these transactions and has extensive references to the standard contracts in New South Wales, Victoria and Queensland.

*Multi-Owned Property in the Asia-Pacific Region* Erika Altmann, Michelle Gabriel, 2018-02-21 This book provides critical insight into the experience of multi-owned property, and showcases different cultural responses across the Asia-Pacific region. Escalating demand for properties within global cities has created exuberance around apartment living; however less well understood are the restrictions on individual rights and responsibilities associated with collective living. In contrast to

the highly populated and traditional communal housing arrangements of past Asian economies, we see an increasing focus on neo-liberalist, market-based policies associated with the rise of an Asian middle class shaping structural change from communal to individualistic. This edited collection unpacks the rights, restrictions and responsibilities of multi-owned property ownership across the Asia-Pacific region; examining the experiences of developers, strata-managers, owners and residents. In doing so, they highlight how the rights of one party affects the restrictions and responsibilities of others within different policy frameworks. This work will reach an interdisciplinary audience including scholars and practitioners of sociology, public policy, urban studies and planning, economics, property management and architecture.

Private Equity, Corporate Governance And The Dynamics Of Capital Market Regulation Justin O'brien,2007-12-03 Global capital markets are in a state of flux. Castigated in the past as “Barbarians at the Gate”, private equity providers are once again proclaiming the end of the public corporation. This important book addresses the implications of private equity for the governance of corporations, the capital markets in which they operate and the professionals who provide corporate advisory services. The book evaluates and ranks the precise nature of the risk posed by private equity by situating it within an overarching analysis of the dynamics of financial capitalism. Key issues addressed include: the management of conflicts of interest, fiduciary duties, the role of enforcement, the efficacy of adopting a rules- or principles-based system of regulation, the form and function of compliance, and a detailed examination of how to embed accountability into an integrity system for the financial markets. The book therefore has enormous benefit for industry, regulatory and academic communities alike./a

Commercial and Economic Law in Australia Dr Lynden Griggs, Prof. George Cho, John McLaren, James Scheibner, 2018-11-30 Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of the law covering merchants' status and obligations – including the laws governing state intervention in economic activities – in Australia provides quick and easy guidance on such commercial and economic matters as business assets, negotiable instruments, commercial securities, and regulation of the conditions of commercial transactions. Lawyers who handle transnational business will appreciate the explanation of local variations in terminology and the distinctive concepts that determine practice and procedure. Starting with a general description of the specifically applicable concepts and sources of commercial law, the book goes on to discuss such factors as obligations of economic operators and institutions, goodwill, broker/client relations, commercial property rights, and bankruptcy. Discussion of economic law covers the laws governing establishment, supervision of economic activities, competition law, and government taxation incentives. These details are presented in such a way that readers who are unfamiliar with specific terms and concepts in varying contexts will fully grasp

their meaning and significance. Thorough yet practical, this convenient volume is a valuable tool for business executives and their legal counsel with international interests. Lawyers representing parties with interests in Australia will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative commercial and economic law.
