Banking and Finance Dispute Resolution in Hong Kong Sau Wai Law, 2023-08-25 This book examines the concept of 'naming, blaming, claiming' in the application of arbitration for private banking dispute resolution. The author focuses on examining this issue using Hong Kong as a case in point, blending theory and empirical evidence to unveil how disputes are resolved within the banking and finance industry, which will enable them to explore possible effective and efficient mechanisms to resolve financial disputes. The book offers a comprehensive review of the laws and regulations governing the private banking industry in Hong Kong and selected jurisdictions, as well as how they are implemented. It examines the clients' perceptions through an innovative methodology for empirical studies. Describing how clients react to the laws and regulations and the potential adverse impacts to the stability of the banking industry, the author identifies possible factors that could trigger another financial crisis. Synthesising his analysis, the author proposes newly discovered self-corrective mechanisms embedded among clients and concludes with policy recommendations. Directly relevant to banking practitioners, particularly legal and compliance departments, and senior management, the book is also written for legal professionals interested in the practices of dispute resolution in banking and finance. Cornes and Lupton's Design Liability in the Construction Industry Sarah Lupton, 2013-11-14 Liability for the design of a building or structure is of fundamental concern to construction professionals, design-build contractors, specialist sub-contractors, and lawyers. Although other texts cover a wide range of aspects of liability, only Cornes and Lupton's Design Liability in Construction draws together all those matters that relate specifically to design. A number of factors have come together recently and are addressed in this significant update and rewrite of the 4th edition, including: popularity of design & build procurement partnering arrangements and early contractor involvement new standard forms of construction contract and appointment, and revisions to older forms technical innovations in construction collaborative working and BIM systems many well-publicised cases regarding design failures significant developments in the law of tort and professional liability the development of the single European market and increased provision of services overseas Together these factors create a new range of design liability issues which the construction professional has to face. Written for lawyers, architects, engineers, and

contractors, the fifth edition of Design Liability in Construction will also serve as a useful text for masters level courses in engineering, surveying and construction law.

Probate Practitioner's Handbook L. C. King, 2018

Enhancing Procurement Practices Attila Kovács, 2011-06-27 Enhancing Procurement Practices is organised around four main points: -overview and analysis of procurement principles, -practical approach to drafting of solicitation and contract documents, -conduct of procurement procedures, -overview of the e-procurement arena. Although the addressed procurement methods can be used on a wide scale, this book concentrates primarily on such cases when the subject of procurement is complex, or the solicited goods and services are relatively simple but the intended long-term relationship calls for a fairly conscious source selection. Project procurement, the most complicated form of buying civil engineering work, goods, and services, is thoroughly addressed. Beyond the structured overview and comparative analysis of terminology and principles, the book describes such new concepts as single-source preference for simultaneous procurements, dual-term frame contract for parallel suppliers, and the use of semi-consolidated contract documents. Effective utilisation of theories boils down - among others - to a consistent set of procurement-related terms, proven methodology for drafting comprehensive solicitation documents and contracts, and practical details of communication with offerors.

Detail Practice: Photovoltaics Bernhard Weller,Claudia Hemmerle,Sven Jakubetz,Stefan Unnewehr,2012-12-10 Die Photovoltaik trägt als wichtiger Baustein im Mix der regenerativen Energien dazu bei, den bereits stattfindenden Klimawandel aufzuhalten und die Erde langfristig mit günstiger Energie zu versorgen. Sie fasziniert mit ihrem Prinzip, lautlos, emissions- und nahezu wartungsfrei aus dem „Nichts“ Strom zu produzieren. Als gebäudegebundene Anlage findet sie ihren idealen Einsatzort genau dort, wo der Strom benötigt wird und nutzt die ohnehin vorhandenen Flächen und Leitungen. Das Ausmaß der derzeitigen Photovoltaik-Anwendungen bleibt jedoch weit hinter ihrem Potenzial zurück, obwohl die Hersteller bereits vielfältige Techniken und Produkte anbieten. Als Gründe gelten insbesondere gestalterische, konstruktive und baurechtliche Probleme. Dieser Band der DETAIL Praxis Reihe zeigt anschaulich, wie die technische, gestalterische und konstruktive Integration der Solaranlagen am Gebäude gelingt. Das Kapitel Baurecht, ein Glossar sowie ergänzende Quellen und Verzeichnisse dienen der weiteren Vertiefung. Vorbildlich realisierte Projektbeispiele mit den unterschiedlichen Einbauvarianten an Dach und Fassade runden das Buch ab.
