Excellence and Equity in Literacy Education William Tunmer,J. Chapman,2015-06-13 Literacy is arguably the most important goal of schooling as, to a large extent, it determines young children's educational and life chances and is fundamental in achieving social justice. New Zealand's literacy education programme has long been regarded as one of the world's most successful approaches to teaching literacy skills to young children. Excellence and Equity in Literacy Education questions this widely held assumption. In the late 1990s the New Zealand government developed a national literacy strategy aimed at reducing persistently large inequities in literacy achievement outcomes. The chapters in this edited volume present evidence indicating that the national literacy strategy has failed, examine the major factors responsible for the continuation of New Zealand's comparatively wide spread of scores in literacy achievement, and describe the most effective strategies for reducing the literacy achievement gap and achieving excellence and equity in New Zealand literacy education.

The Sarbanes Oxley Act of 2002 Nick Oberheiden,2004-01-03 Essay from the year 2003 in the subject Politics - Region: USA, grade: LL.M. accreditation, Fordham University (Application Office), course: Study in the USA, language: English, abstract: The objective of the following article is to comment on the Sarbanes-Oxley Act of 2002 ("Act") from a transatlantic point of view and to discuss its effects on foreign companies as far as theoretical or practical impacts are already visible at this early stage. It is an attempt to show the compatibility of the Act with other legal systems, especially with the existing German regulations. It is not the goal of this paper to point out the important changes regarding requirements in general. In a first section (I) the author wants to describe briefly the reasons for enacting the Act and to present the problems that occur with some of the regulations contained therein. In a second step (II), the author will outline the Act's impacts on German and other European legal systems. In a final conclusion (III) the author wants to use the "holdings" he worked out in the second part to discuss the reform and criticize some aspects of the Act in an international light.
