What Science Tells Us about Autism Spectrum Disorder Raphael A. Bernier, Geraldine Dawson, Joel T. Nigg, 2020-02-05
What have scientists learned about the causes of autism spectrum disorder (ASD)? Can parents do anything to prevent it? Why do different kids have such different symptoms, and what are the best ways to deal with them? Will there ever be a cure? From leading autism researchers Raphael Bernier, Geraldine Dawson, and Joel Nigg, this accessible guide helps parents put the latest advances to work for their unique child. From the impact of sleep, exercise, diet, and technology, to which type of professional help might be the right fit, the authors cover it all with expertise and compassion. Above all, they emphasize that current progress makes this an encouraging time for anyone who wants to help children and teens on the spectrum live to their fullest potential.

Comic Strip Conversations Carol Gray, 1994 Carol Gray combines stick-figures with conversation symbols to illustrate what people say and think during conversations. Showing what people are thinking reinforces that others have independent thoughts--a concept that spectrum children don't intuitively understand. Children can also recognize that, although people say one thing, they may think something quite different--another concept foreign to concrete-thinking children. Children can draw their own comic strips to show what they are thinking and feeling about events or people. Different colors can represent different states of mind. These deceptively simple comic strips can reveal as well as convey quite a lot of substantive information. The author delves into topics such as: What is a Comic Strip Conversation? The Comic Strip Symbols Dictionary Drawing small talk Drawing about a given situation Drawing about an upcoming situation Feelings and COLOR

Incorporating Social Goals in the Classroom Rebecca Moyes, 2001-03-15 This book provides practical, hands-on strategies to teach social skills to children with high-functioning autism and Asperger Syndrome. Instruction is included to enhance the development of appropriate, measurable, and meaningful individualized education plans (IEPs). Lesson plans are included to facilitate the ability to 'teach' these goals.

Ten on the Sled Kim Norman, 2011-06-28 Author Kim Norman (Crocodaddy) and illustrator Liza Woodruff have whipped up a rollicking, jolly, snow-filled adventure! In the land of the midnight sun, all the animals are having fun speeding down the hill on Caribous sled. But as they go faster and faster, Seal, Hare, Walrus, and the others all fall off...until just Caribous left, only and lonely. Now, a reindeer likes flying-but never alone, so...one through ten, all leap on again! An ideal picture book for

reading-and singing along with-over and over.

COMPASS and Implementation Science Lisa A. Ruble,John H. McGrew,2015-05-25 This Brief examines COMPASS – the Collaborative Model for Promoting Competence and Success – a consultation-based intervention specialized for children with Autism Spectrum Disorder (ASD). Based on the Evidence-Based Practices in Psychology (EBPP) framework, the volume describes the processes that strengthen the expert support relationships between consultant and teacher (i.e., implementation) and between teacher and student (i.e., intervention). In addition, the Brief addresses how consultation methods work within COMPASS, with teachers learning from consultants' implementation methods to tailor instructions that are specific to students' educational and personal factors. This unique framework corresponds with current, widespread research and aims to provide more effective educational services for students with ASD during their crucial formative years. Topics featured in this text include: COMPASS practice outcome based on idiographic assessment and measures of quality. Evidence for the efficacy of COMPASS. COMPASS implementation quality. COMPASS intervention quality and active ingredients. Teacher and student internal and external factors impacting COMPASS. COMPASS and Implementation Science is a must-have resource for clinicians, scientist-practitioners, researchers, and graduate students in the fields of child and school psychology, behavioral therapy, and social work as well as rehabilitation, special education, and speech pathology.

Understanding, Developing, and Writing Effective IEPs Roger Pierangelo,George Giuliani,2007-04-06 The authors tackle an often complex process in an understandable, sequential manner. —Mary L. Jackson, Resource Teacher Roosevelt Elementary, Kingsport, TN Clear, helpful answers for educators involved in developing Individualized Education Programs. Creating and evaluating Individualized Education Programs (IEPs) for students with disabilities is a major responsibility for teachers and school leaders, yet the process involves legal components not always understood by educators. In Understanding, Developing, and Writing Effective IEPs, legal and special education experts Roger Pierangelo and George Giuliani provide K-12 educators with a clear step-by-step plan for IEP development that helps guarantee a Free and Appropriate Public Education (FAPE) in the Least Restricted Environment (LRE) for students with disabilities. Frequently Asked Questions and a glossary of easy-to-understand special education terminology enable every member of the IEP team to develop a meaningful, functional program that meets a student's unique needs. Aligned with the latest reauthorization of IDEA 2004, this practical resource also includes: Descriptions of the IEP process Sample materials from authentic IEPs Checklists, forms, and reproducibles for planning an effective IEP meeting Guidelines that encourage positive collaboration between educators and families Ideal for teachers and administrators, this jargon-free text provides techniques, suggestions, and information for all aspects of the IEP process.

Educating Children with Autism National Research Council,Division of Behavioral and Social Sciences and Education,Committee on Educational Interventions for Children with Autism,2001-11-11 Autism is a word most of us are

familiar with. But do we really know what it means? Children with autism are challenged by the most essential human behaviors. They have difficulty interacting with other people-often failing to see people as people rather than simply objects in their environment. They cannot easily communicate ideas and feelings, have great trouble imagining what others think or feel, and in some cases spend their lives speechless. They frequently find it hard to make friends or even bond with family members. Their behavior can seem bizarre. Education is the primary form of treatment for this mysterious condition. This means that we place important responsibilities on schools, teachers and children's parents, as well as the other professionals who work with children with autism. With the passage of the Individuals with Disabilities Education Act of 1975, we accepted responsibility for educating children who face special challenges like autism. While we have since amassed a substantial body of research, researchers have not adequately communicated with one another, and their findings have not been integrated into a proven curriculum. Educating Children with Autism outlines an interdisciplinary approach to education for children with autism. The committee explores what makes education effective for the child with autism and identifies specific characteristics of programs that work. Recommendations are offered for choosing educational content and strategies, introducing interaction with other children, and other key areas. This book examines some fundamental issues, including: How children's specific diagnoses should affect educational assessment and planning How we can support the families of children with autism Features of effective instructional and comprehensive programs and strategies How we can better prepare teachers, school staffs, professionals, and parents to educate children with autism What policies at the federal, state, and local levels will best ensure appropriate education, examining strategies and resources needed to address the rights of children with autism to appropriate education. Children with autism present educators with one of their most difficult challenges. Through a comprehensive examination of the scientific knowledge underlying educational practices, programs, and strategies, Educating Children with Autism presents valuable information for parents, administrators, advocates, researchers, and policy makers.

Becoming Scientists Rusty Bresser, Sharon Fargason, 2023-10-10 Most important to being a good science teacher is holding the expectation that all students can be scientists and think critically. Providing a thinking curriculum is especially important for those children in diverse classrooms who have been underserved by our educational system. -; Becoming Scientists Good science starts with a question, perhaps from the teacher at the start of a science unit or from the children as they wonder what makes a toy car move, how food decomposes, or why leaves change color. Using inquiry science, children discover answers to their questions in the same way that scientists do-;they design experiments, make predictions, observe and describe, offer and test explanations, and share their conjectures with others. In essence, they construct their own understanding of how the world works through experimentation, reflection, and discussion. Look into real classrooms where teachers practice inquiry science and engage students in the science and engineering practices outlined in the Next

Generation Science Standards. Rusty Bresser and Sharon Fargason show teachers how to do the following: Build on students' varied experiences, background knowledge, and readiness Respond to the needs of students with varying levels of English language proficiency Manage a diverse classroom during inquiry science exploration Facilitate science discussions Deepen their own science content knowledge As the authors state, Inquiry science has little to do with textbooks and lectures and everything to do with our inherent need as a species to learn about and reflect on the world around us. Join your students on a journey of discovery as you explore your world via inquiry.

Teaching Adolescents With Autism Walter Kaweski, 2011-05-11 This book offers general education teachers a wide variety of cutting edge, research-tested strategies and tool for supporting middle and secondary students with autism in the classroom while meeting the challenges of each school day. The text blends personal anecdotes with research-based strategies and is filled with hundreds of valuable ideas to help teachers with everything from understanding autism and special education policy to becoming an effective team member, supporting students with diverse needs, developing peer friendships, and solving behavior challenges. In addition, the book includes a resource guide that teachers can use to prepare and train instructional assistants to work with students who have autism.

Building on the Strengths of Students with Special Needs Toby Karten, 2017-03-10 As a must-have reference for busy teachers with little special education training, this book supplies classroom-tested instructional strategies that address the characteristics of and challenges faced by students with special needs. Dozens of differentiated strategies target teachers'

anxieties and provide responsive interventions that can be used to address specifics of IEPs and learning plans. With *Building on the Strengths of Students with Special Needs*, special education expert Toby Karten focuses on specific disabilities and inclusive curriculum scenarios for learners in K-12 environments. She offers valuable advice on how to prevent labels from capping student potential and encouragement to help teachers continually improve learner outcomes. By highlighting more than a dozen disability labels, this resource walks teachers through the process of reinforcing, motivating, scaffolding, and planning for instruction that targets learners of all ability levels. Included are details relevant to each disability: * Possible Causes * Characteristics and Strengths * Classroom Implications * Inclusion Strategies Typical instruction needs to match the diversity of atypical learners without viewing any disability as a barrier that impedes student achievement. Teachers must not only learn how to differentiate their approach and target specific student strengths but also maintain a positive attitude and belief that all students are capable of achieving self-efficacy.

Collaborative Model for Promoting Competence and Success for Students with ASD Lisa A. Ruble, Nancy J. Dalrymple, John H. McGrew, 2012-03-23 This book offers individual assessment and program planning for students with autism spectrum disorders, based in life experiences, with family and teacher input. A complete guide to successful learning, it includes protocols, scripts, forms and case examples.

Autism Spectrum Disorders Dianne Zager, David F. Cihak, Angi Stone-MacDonald, 2004-09-22 The field of autism has been growing at an unprecedented rate in recent years. In addition to an actual rise in the number of classic DSM-IV cases, broadened diagnostic criteria have uncovered a wider range of autistic behaviors and ability levels. The third edition of this well-known text continues the mission of its predecessors--to present a comprehensive, readable, up-to-date overview of the field of autism, one that links research, theory, and practice in ways that are accessible to both practitioners and parents. Key features include: *Expanded Coverage--To accommodate the recent explosion of research, the book has been expanded from 11 to 14 chapters that examine the impact of autism on the individual and the family from infancy through adulthood. *Expertise--Internationally recognized experts offer cutting-edge treatment and educational information on topics such as early diagnosis, medical treatment, assessment, educational methods, language development, behavior regulation, and family support. *Neurobiological Research--Comprehensive medical research and treatment chapters provide an understandable overview of neurobiological research and current treatments including when and how medication can be employed as part of a treatment plan. *Focus on Early Years--Old sections I and III have been combined and a new 3-chapter section on early identification and intervention added. *Focus on Parents and Families--In addition to a chapter on the evolving role of families, a new chapter addresses family needs during the preschool years. *Integration of Assessment and Intervention--The chapters on assessment and intervention have been reorganized and more closely integrated in keeping with current thinking about their inter-relatedness. *Future Directions--Two chapters discuss emerging directions in this exploding field and how to

make informed decisions among a variety of approaches. This book is appropriate for anyone--students, practitioners, or parents--who must provide care for an autistic child.

Social Skills for Students With Autism Spectrum Disorder and Other Developmental Disabilities Laurence Sargent, 2011-01-01 An update to *Social Skills for School and Community*, this timely new edition places a greater focus on teaching social skills in inclusive settings by creating learning opportunities in general education environments. The book contains 50 strategies for individual and small group instruction with follow-up strategies for facilitating maintenance and generalization. The strategies and lessons included in this manual are designed to address the needs of students who fall into the mild and moderate end of the spectrum of students with ASD and other developmental disabilities. The strategies encompassed in teaching students with ASD have wide-ranging value in addressing the social skills needs of students with other disabilities and those who are at-risk. The book contains an accompanying CD containing printable copies of assessment and evaluation checklists, homework forms, comic strips, photographs, and story sequences for teaching and reinforcing social skills. Additional resources include expression pictures and a file related to data collection and progress monitoring.
