Living Standards and Social Well-Being Deborah Figart, John Marangos, 2013-09-13 Too many of the world's citizens face impoverished living standards. The economic and financial crises have made matters worse. The viewpoint of Living Standards and Social Well-Being is that the fundamental objective for an economy is provisioning, not simply efficiency. The chapters in this volume examine how economies across the globe come to understand what constitutes a living and how they can improve living standards, including balancing paid work with family life and civic responsibility. The authors provide historical, theoretical, and empirical studies of moving economies at the macro level and households at the micro level toward improved living standards. It is argued that achieving well-being and decent living standards, through work and welfare state policies, is a social responsibility. Such improvements could be delivered through basic income policies, family support, job guarantees, decent work, shorter work weeks, and support from social welfare. These issues are important for economics and the other social sciences and in particular for social economics. This book was published as a special issue of the Review of Social Economy.

Insights into Policies and Practices on the Right to Development Carol Chi Ngang, Serges Djoyou Kamga, 2020-10-06 As the world continues to grapple with a range of practical development challenges that are directly linked to livelihood concerns about human well-being and declining living standards, often overlooked is the human right to development, which remains largely unfulfilled. In the face of successive global initiatives seeking to remedy these challenges, it has become urgent to ask what the universal recognition of the right to development implies if it cannot be translated into improved well-being for impoverished peoples around the world. The contributors in this timely volume argue that setbacks to development are deeply rooted in the failure to implement the right to development, which by nature guarantees equality of opportunities and equitable redistribution of the resources that contribute to better living standards. Assessing policy and practical measures (or the lack thereof), they offer practical suggestions for implementation that will make the right to development a reality for everyone.

Next, the selection deals with the topics that cross paths with human rights, such as militarization, agrarian reform, and labor and social legislation. Health and Welfare during Industrialization Richard H. Steckel,Roderick Floud,2008-04-15 In this unique anthology, Steckel and Floud coordinate ten essays that bring a new perspective to inquiry about standard of living in modern times. These papers are arranged for international comparison, and they individually examine evidence of health and welfare during

and after industrialization in eight countries: the United States, Britain, Sweden, the Netherlands, France, Germany, Japan, and Australia. The essays incorporate several indicators of quality of life, especially real per capita income and health, but also real wages, education, and inequality. And while the authors use traditional measures of health such as life expectancy and mortality rates, this volume stands alone in its extensive use of new anthropometric data—information about height, weight and body mass index that indicates changes in nations' well-being. Consequently, *Health and Welfare during Industrialization* signals a new direction in economic history, a broader and more thorough understanding of what constitutes standard of living.

Contemporary Issues in Applied Economics Moriki Hosoe,Biung-Ghi Ju,Akira Yakita,Kiseok Hong,2019-06-12 An important feature of this book is its analysis of various contemporary issues in applied economics, distinguished by advanced theoretical research and empirical analysis focusing on Japan and Korea. The book consists of four parts, the first of which investigates economic growth and welfare, using tools of applied analysis. In Part II, it examines inequality, redistribution, and intergenerational transfers, mainly on an empirical basis. In turn, Part III explores public policy and political economics, while Part IV addresses resource and environmental economics on the basis of data from Japan and Korea. In addition to offering valuable insights, this collection of papers commemorates the 10th anniversary of academic exchange between the Japan Association for Applied Economics (JAAE) and the Korean Association for Applied Economics (KAAE).

The Standard of Living and Revolutions in Russia, 1700-1917 Boris Nikolaevich Mironov,2012 This is the first full-scale

anthropometric history of Imperial Russia (1700-1917). It mobilizes an immense volume of archival material to chart the growth, weight, and other anthropometric indicators of the male and female populations in order to chart how the standard of living in Russia changed over slightly more than two centuries. It draws on a wide range of data--statistics on agricultural production, taxation, prices and wages, nutrition, and demography--to draw conclusions on the dynamics in the standard of living over this long period of time. The economic, social, and political interpretation of these findings make it possible to reconsider the prevailing views in the historiography and to offer a new perspective on Imperial Russia.

We Too Can Prosper Graham Hutton, 2022-02-26 First published in 1953, *We Too Can Prosper* is the outcome of a unique

collaboration between Mr. Graham Hutton, the author, Mr. Geoffrey Crowther, his friend and fellow economist, and a panel of experts nominated by the employers' organisations and trade unions represented on the British Productivity Council. The Council invited the author and Mr. Crowther, as independent economists, to bring together the experience of the 66 Productivity Teams which visited America since 1949 and combine it with their own expert knowledge of economic conditions on both sides of the Atlantic, to throw light on Britain's industrial future. The book covers an enormous range of subjects: from education to mechanisation, from consumers' habits to advertising, and from the rate of installing capital equipment to the roles of government, competition and 'bigness in business.' Painstakingly, simply and logically, the book shows that if the British people want to overcome recurrent economic crises and raise their standards of life, they can do so quickly, provided they organise to do so. This book will be of interest to students of economics, economic history and development.
