## Ruha Benjamin

**Dictionary of Race, Ethnicity and Culture** Guido Bolaffi, 2003 Race, ethnicity and culture are concepts that are interpreted in various and often contradictory ways. This dictionary provides the historical background and etymology of a wide range of words related to these concepts and ideas.

**Understanding 'Race' and Ethnicity** Chattoo, Sangeeta, Atkin, Karl, 2019-04-10 This new edition of a widely-respected textbook examines welfare policy and racism in a broad framework that marries theory, evidence, history and contemporary debate. Fully updated, it contains: • a new foreword by Professor Kate Pickett, acclaimed co-author of *The Spirit Level* • two new chapters on disability and chronic illness, and UK education policy respectively • updated examples and data, reflecting changes in black and minority ethnic demographics in the UK • a post-script from a minority student on her struggle to make a new home in Britain Suitable for undergraduate and postgraduate courses in social policy, sociology and applied social sciences, its global themes of immigration, austerity and securitisation also make it of considerable interest to policy and welfare practitioners.

**Eliminating Health Disparities** National Research Council, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, Panel on DHHS Collection of Race and Ethnicity Data, 2004-08-09 Disparities in health and health care across racial, ethnic, and socioeconomic backgrounds in the United States are well documented. The reasons for these disparities are, however, not well understood. Current data available on race, ethnicity, SEP, and accumulation and language use are severely limited. The report examines data collection and reporting systems relating to the collection of data on race, ethnicity, and socioeconomic position and offers recommendations.

Understanding Racial and Ethnic Differences in Health in Late Life National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Population, Panel on Race, Ethnicity, and Health in Later Life, 2004-09-08 As the population of older Americans grows, it is becoming more racially and ethnically diverse. Differences in health by racial and ethnic status could be increasingly consequential for health policy and programs. Such differences are not simply a matter of education or ability to pay for health care. For instance, Asian Americans and Hispanics appear to be in better health, on a number of indicators, than White Americans, despite, on average, lower socioeconomic status. The reasons are complex, including possible roles for such factors as selective migration, risk behaviors, exposure to various stressors, patient

attitudes, and geographic variation in health care. This volume, produced by a multidisciplinary panel, considers such possible explanations for racial and ethnic health differentials within an integrated framework. It provides a concise summary of available research and lays out a research agenda to address the many uncertainties in current knowledge. It recommends, for instance, looking at health differentials across the life course and deciphering the links between factors presumably producing differentials and biopsychosocial mechanisms that lead to impaired health.

*Race, Ethnicity, and Language Data* Institute of Medicine, Board on Health Care Services, Subcommittee on Standardized Collection of Race/Ethnicity Data for Healthcare Quality Improvement, 2009-12-30 The goal of eliminating disparities in health care in the United States remains elusive. Even as quality improves on specific measures, disparities often persist. Addressing these disparities must begin with the fundamental step of bringing the nature of the disparities and the groups at risk for those disparities to light by collecting health care quality information stratified by race, ethnicity and language data. Then attention can be focused on where interventions might be best applied, and on planning and evaluating those efforts to inform the development of policy and the application of resources. A lack of standardization of categories for race, ethnicity, and language data has been suggested as one obstacle to achieving more widespread collection and utilization of these data. *Race, Ethnicity, and Language Data* identifies current models for collecting and coding race, ethnicity, and language data; reviews challenges involved in obtaining these data, and makes recommendations for a nationally standardized approach for use in health care quality improvement.

**Race After Technology** Ruha Benjamin, 2019-06-10 From everyday apps to complex algorithms, Ruha Benjamin cuts through tech-industry hype to understand how emerging technologies can reinforce White supremacy and deepen social inequity. Benjamin argues that automation, far from being a sinister story of racist programmers scheming on the dark web, has the potential to hide, speed up, and deepen discrimination while appearing neutral and even benevolent when compared to the racism of a previous era. Presenting the concept of the “New Jim Code,” she shows how a range of discriminatory designs encode inequity by explicitly amplifying racial hierarchies; by ignoring but thereby replicating social divisions; or by aiming to fix racial bias but ultimately doing quite the opposite. Moreover, she makes a compelling case for race itself as a kind of technology, designed to stratify and sanctify social injustice in the architecture of everyday life. This illuminating guide provides conceptual tools for decoding tech promises with sociologically informed skepticism. In doing so, it challenges us to question not only the technologies we are sold but also the ones we ourselves manufacture. **Race and Ethnicity in America** John Iceland, 2017-02-14 This book examines patterns and trends in racial inequality over the past several decades. Iceland finds that color lines have softened over time, as there has been some narrowing of

differences across many indicators for most groups over the past sixty years. Asian Americans in particular have reached socioeconomic parity with white Americans. Nevertheless, deep-seated inequalities in income, poverty, unemployment, and health remain, especially among blacks, and, to a lesser extent, Hispanics. The causes for disadvantage for the groups vary, ranging from a legacy of racism, current discrimination, human capital deficits, the unfolding process of immigrant incorporation, and cultural responses to disadvantage.--Provided by publisher.

**Dictionary of Race, Ethnicity and Culture** Guido Bolaffi, Raffaele Bracalenti, Peter Braham, Sandro Gindro, 2002-10-18 Race, ethnicity and culture are concepts of extreme relevance in society today, and yet continue to be interpreted in various and often contradictory ways. The Dictionary provides the historical background and etymology of a wide range of words related to these concepts, looking at discourses of race, ethnicity and culture from a broadly multicultural perspective. This new and up-to-date dictionary contains numerous references to both European and American concepts, debates and terms that are relevant today- including words such as 'boat people', 'cybernazis', 'ebonics' as well as more established words and terms, such as 'affirmative action', 'caste', 'fortress Europe' and many more. The editors have brought together a group of internationally prominent academics and practitioners to produce this definite reference and research tool. Contributors include anthropologists, biologists, lawyers, philosophers, sociologists and psychologists, enabling the Dictionary to bring an interdisciplinary approach to the subject matter, and a rich variety of voice and content that would otherwise be absent. The Dictionary of Race, Ethnicity and Culture will provide a valuable tool for scholars, students, professionals and policy makers. It will help undergraduate and graduate students to use conceptual material effectively to write better essays, and will be an essential source of reference in the professional fields, particularly for social workers and teachers.

Ethnicity and Race Stephen Cornell, Douglas Hartmann, 2006-12-15 This book is very well written and clearly organized throughout. It is pitched at upper-level undergraduate and graduate-level race and ethnicity students...in sum, this is an important book, highly recommended to students and faculty alike. The authors draw extensively from classic and contemporary sociological theory throughout the text and maintain a transnational focus in each and every chapter. —TEACHING SOCIOLOGY Ethnicity and Race: Making Identities in a Changing World, Second Edition uses examples and extended case studies from all over the world to craft a compelling, even-handed account of the power and persistence of ethnicity and race in the contemporary world. Known for its conceptual clarity, world-historical scope, and fair-minded treatment of these oft controversial topics, this updated and expanded edition retains all of the core elements and constructionist insights of the original.

*Critical Perspectives on Racial and Ethnic Differences in Health in Late Life* National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Population, Panel on Race, Ethnicity, and Health in Later Life, 2004-10-16 In their later years, Americans of different racial and ethnic backgrounds are not in equally good-or equally

poor-health. There is wide variation, but on average older Whites are healthier than older Blacks and tend to outlive them. But Whites tend to be in poorer health than Hispanics and Asian Americans. This volume documents the differentials and considers possible explanations. Selection processes play a role: selective migration, for instance, or selective survival to advanced ages. Health differentials originate early in life, possibly even before birth, and are affected by events and experiences throughout the life course. Differences in socioeconomic status, risk behavior, social relations, and health care all play a role. Separate chapters consider the contribution of such factors and the biopsychosocial mechanisms that link them to health. This volume provides the empirical evidence for the research agenda provided in the separate report of the Panel on Race, Ethnicity, and Health in Later Life.

*Race and Ethnicity in Latin America* Peter Wade, 2010-09-15 For over ten years, *Race and Ethnicity in Latin America* has been an essential text for students studying the region. This second edition adds new material and brings the analysis up to date. Race and ethnic identities are increasingly salient in Latin America. Peter Wade examines changing perspectives on Black and Indian populations in the region, tracing similarities and differences in the way these peoples have been seen by academics and national elites. Race and ethnicity as analytical concepts are re-examined in order to assess their usefulness. This book should be the first port of call for anthropologists and sociologists studying identity in Latin America.

Assessing Race, Ethnicity and Gender in Health Sana Loue, 2006-12-22 This book deals specifically with the historical basis for use of terms in race, gender, ethnicity, sex and sexual orientation. It brings much needed clarity to the debate by identifying the ethical issues as well as the technical challenges inherent in measuring these elusive concepts. The author expands on her work begun in *Gender, Ethnicity, and Health Research* by paralleling the evolution of racial and sexual categories with the development of health research. In addition, the book provides a salient guide to assessment tools currently used in measuring racial and sexual constructs, identity, and experience.

Key Concepts in Race and Ethnicity Nasar Meer, 2014-07-28 A conceptually power-packed volume that is at once erudite and accessible, expansive and focused, true to sociological traditions yet stimulatingly exploratory. Scholars and students will be served very well by this absorbing, far-reaching enquiry into ethnicity and race. - Raymond Taras, Tulane University This concise, profound, and beautifully written book offers a tour de force across the landscape of race and ethnicity by a young author who masters them all. - Per Mouritsen, Aarhus University This book offers an accessible discussion of both foundational and novel concepts in the study of race and ethnicity. Each account will help readers become familiar with how long standing and contemporary arguments within race and ethnicity studies contribute to our understanding of social and political life more broadly. Providing an excellent starting point with which to understand the contemporary relevance of these concepts, Nasar Meer offers an up-to-date and engaging consideration of everyday examples from around the world. This is an indispensable guide for both students and established researchers interested in the study of race and ethnicity.

*How Real Is Race?* Carol C. Mukhopadhyay, Rosemary Henze, Yolanda T. Moses, 2013-12-11 How real is race? What is biological fact, what is fiction, and where does culture enter? What do we mean by a “colorblind” or “postracial” society, or when we say that race is a “social construction”? If race is an invention, can we eliminate it? This book, now in its second edition, employs an activity-oriented approach to address these questions and engage readers in unraveling—and rethinking—the contradictory messages we so often hear about race. The authors systematically cover the myth of race as biology and the reality of race as a cultural invention, drawing on biocultural and cross-cultural perspectives. They then extend the discussion to hot-button issues that arise in tandem with the concept of race, such as educational inequalities; slurs and racialized labels; and interracial relationships. In so doing, they shed light on the intricate, dynamic interplay among race, culture, and biology. For an online supplement to *How Real Is Race?* Second Edition, [click here](#).

### **Mental Health**, 2001

**Religion and the Creation of Race and Ethnicity** Craig R Prentiss, 2003-06-01 The original essays in this collection shed light on the role religion and myth have played in the creation of race and ethnic categories. When scholars approach religion and race, they tend to focus on such issues as how African Americans have expressed Christianity, or how Japanese or Mexicans have lived “religiously.” This volume, meant specifically for those new to the field, offers a different perspective. Prominent scholars illuminate the role religious myths have played in shaping those very social boundaries that we call “races” and “ethnicities.” It asks, what part did Christianity play in creating “Blackness”? To what extent was Japanese or Mexican identity itself the product of religious life? The text, comprised of all original material, introduces readers to the social construction of race and ethnicity and the ways in which these concepts are shaped by religious narratives. It offers examples from both the U.S. and around the world, exploring these themes in the context of places as diverse as Bosnia, India, Japan, Mexico, Zimbabwe, and the Middle East. The volume helps make the case that any account of the social construction of race and ethnicity will be incomplete if it fails to consider the influence of religious traditions and myths.

**Racisms** Steve Garner, 2009-11-25 A very clear and engaging introduction to a contemporary analysis of ‘race’ and racism(s). This text effectively combines key theoretical perspectives with vivid contemporary examples. - Dr Rebecca Barnes, University of Derby Fantastic book for helping students get past the stuntedness of the term ‘racism’ to understand the way in which racisms are part of our social practices and institutions. - Dr Lucy Michael, Hull University This is a solid text, covering the topic in a thoughtful manner. Studying and teaching racism is a complex issue, and this book is a very good resource. - Dr Sanjay Sharma, Brunel University We hear much about ‘race’ and ‘racism’ in public discourse but the terms are frequently used without clear definitions or practical examples of how these phenomena work. *Racisms: An Introduction* introduces practical methods which enable students to think coherently and sociologically about this complex feature of the global landscape. Steve Garner argues that there is no single monolithic object of analysis but rather a plural set of ideas and

practices that result in the introduction of 'race' into social relations. This differs over time and from one place to another. Focussing on the basics, this book: Defines 'race', 'racism', 'institutional racism' and 'racialization'. Provides examples of how these function in fields like the natural sciences and asylum. Clearly sets out theoretical arguments around collective identities ('race', class, gender, nation, religion). Uses empirical case studies, including some drawn from the author's own fieldwork. Points students toward sources of further web and text based information. Engaging and accessible this book provides a signposted route into key elements of contemporary debates. It is an ideal introduction for undergraduates studying 'race' and ethnicity, social divisions and stratification.

**Race and Ethnicity** Stephen Spencer, 2014-03-14 Broad-ranging and comprehensive, this completely revised and updated textbook is a critical guide to issues and theories of 'race' and ethnicity. It shows how these concepts came into being during colonial domination and how they became central – and until recently, unquestioned – aspects of social identity and division. This book provides students with a detailed understanding of colonial and post-colonial constructions, changes and challenges to race as a source of social division and inequality. Drawing upon rich international case studies from Australia, Guyana, Canada, Malaysia, the Caribbean, Mexico, Ireland and the UK, the book clearly explains the different strands of theory which have been used to explain the dynamics of race. These are critically scrutinised, from biological-based ideas to those of critical race theory. This key text includes new material on changing multiculturalism, immigration and fears about terrorism, all of which are critically assessed. Incorporating summaries, chapter-by-chapter questions, illustrations, exercises and a glossary of terms, this student-friendly text also puts forward suggestions for further project work. Broad in scope, interactive and accessible, this book is a key resource for undergraduate students of 'race' and ethnicity across the social sciences.

**The Fateful Triangle** Stuart Hall, 2017-09-11 “Given the current political conditions, these lectures on race, ethnicity, and nation, delivered by Stuart Hall almost a quarter of a century ago, may be even more timely today.” —Angela Y. Davis In this defining statement one of the founding figures of cultural studies reflects on the divisive, often deadly consequences of our contemporary politics of race and identity. As he untangles the power relations that permeate categories of race, ethnicity, and nationhood, Stuart Hall shows how old hierarchies of human identity were forcefully broken apart when oppressed groups introduced new meanings to the representation of difference. Hall challenges us to find more sustainable ways of living with difference, redefining nation, race, and identity. “Stuart Hall bravely confronts the persistence of race—and its confounding liberal surrogates, ethnicity and nation...This is a profoundly humane work that...finds room for hope and change.” —Orlando Patterson “Stuart Hall’s written words were ardent, discerning, recondite, and provocative, his spoken voice lyrical, euphonious, passionate, at times rhapsodic and he changed the way an entire generation of critics and commentators debated issues of race and cultural difference.” —Henry Louis Gates, Jr. “Essential reading for those seeking

to understand Hall's tremendous impact on scholars, artists, and filmmakers on both sides of the Atlantic." —Artforum

**Raciolinguistics** John R. Rickford, 2016 Raciolinguistics reveals the central role that language plays in shaping our ideas about race. This team of leading scholars-working both within and beyond the United States-shares powerful, much-needed research to help us understand the increasingly vexed relationships between race, ethnicity, and language in our rapidly changing world.
