Essential Interviewing Skills for the Helping Professions Nicole Nicotera, 2018-04-26 Essential Interviewing Skills for the Helping Professions reaches beyond most other essential skills for clinical interviewing books with its emphasis on social justice, attention to the role of microaggressions in clinical practice, and the utmost importance of practitioner wellness as integral to longevity in the helping professions. Each chapter addresses interviewing skills that are foundational to the helping professions from mental health to physical health, includes detailed exercises, addresses social justice, and discusses practitioner wellness opportunities. Sometimes clients' stories are fraught with trauma, other times their stories are bound within generations of substance addiction or family violence, while other clinical stories present personal and social obstacles that arise from years of oppression at the hands of prejudice and discrimination. This book therefore goes beyond the basic ideas of choosing when to use an open question or to reflect emotions by covering how to integrate social justice and knowledge of power, privilege, and oppression into the interviewing arena. Essential interviewing skills require the practitioner to not only purposefully listen to the client's story, but also to be self-aware and willing to acknowledge mistakes and learn from them. The work of the clinical interviewer is a continuous challenge of balancing listening, responding, action, and self-awareness, and this book is designed to help.

Clinical Supervision in the Real World Francis Martin, Janet Turner, 2019-12-06 This practical guide provides support for mental health practitioners as they develop their approach to clinical supervision, drawing on the authors' extensive experience of counseling and psychotherapy to bring readers into the real world of clinical supervision. Chapters introduce the essential responsibilities and tasks of a clinical supervisor and place emphasis on the development of a Competence-Oriented Model of Clinical Supervision, upon which a philosophical foundation for supervision can be built. Integrating up-to-date research with case vignettes and practical resources, the text discusses philosophies of clinical supervision and explores themes that often define a supervisor's contextual world, from professional ethics and legal issues to the personal development of both the supervisor and the supervisee. Affirming and encouraging professional development as well as identifying a range of common challenges, Clinical Supervision in the Real World is a key resource for aspiring clinical supervisors looking to build their own philosophy of supervision.

Gatekeeping in the Mental Health Professions Alicia M. Homrich, Kathryn L. Henderson, 2018-06-11 This book guides graduate faculty and supervisors in effective gatekeeping by bringing together the body of professional performance standards for multiple mental health fields and providing best practices, tools, and templates for use with trainees. Following an introduction to the professional, ethical, and legal issues involved in gatekeeping, the authors discuss contextual factors that can affect trainee functioning. Topics addressed include strategies for assisting low-performing trainees, faculty and supervisor roles, professional collaboration, evaluating trainee performance, designing remediation plans, documentation, and prevention and early intervention. Text features include Notes From the Field, On the Legal Side, and What Would You Do? to enhance understanding of the material. Gatekeeping in the Mental Health Professions presents a treasure trove of rigorous scholarship and practical recommendations for addressing one of the most vexing challenges that clinical educators and supervisors face—dealing with the problematic personal issues, interpersonal behavior, or unprofessional conduct of a student/trainee. From admission to graduate school through licensing for independent practice, the authors provide policies, procedures, contracts, and sample dialogues that are compassionate, mindful of students' varying developmental stages, and respectful of due process. This authoritative text will help to fulfill the fundamental responsibility of every clinical educator and supervisor to protect our profession and the clients we serve. —Anne Marie Nancy Wheeler, JD, and Burt Bertram, EdD, Coauthors, *The Counselor and the Law* This unique and valuable contribution to the field covers all aspects of gatekeeping, a term frequently discussed but sometimes not practiced. As the experts in this volume point out, mental health educational programs are ethically bound to ensure that their graduates are competent. This book not only discusses gatekeeping responsibilities but also provides useful ways to practice and document them. This must-read text is thorough, interesting, and critically important. —Samuel T.
