**Reading in the Wild** Donalyn Miller,2013-11-04 In Reading in the Wild, reading expert Donalyn Miller continues the conversation that began in her bestselling book, The Book Whisperer. While The Book Whisperer revealed the secrets of getting students to love reading, Reading in the Wild, written with reading teacher Susan Kelley, describes how to truly instill lifelong wild reading habits in our students. Based, in part, on survey responses from adult readers as well as students, Reading in the Wild offers solid advice and strategies on how to develop, encourage, and assess five key reading habits that cultivate a lifelong love of reading. Also included are strategies, lesson plans, management tools, and comprehensive lists of recommended books. Copublished with Editorial Projects in Education, publisher of Education Week and Teacher magazine, Reading in the Wild is packed with ideas for helping students build capacity for a lifetime of wild reading. When the thrill of choice reading starts to fade, it's time to grab Reading in the Wild. This treasure trove of resources and management techniques will enhance and improve existing classroom systems and structures. —Cris Tovani, secondary teacher, Cherry Creek School District, Colorado, consultant, and author of Do I Really Have to Teach Reading? With Reading in the Wild, Donalyn Miller gives educators another important book. She reminds us that creating lifelong readers goes far beyond the first step of putting good books into kids' hands. —Franki Sibberson, third-grade teacher, Dublin City Schools, Dublin, Ohio, and author of Beyond Leveled Books Reading in the Wild, along with the now legendary The Book Whisperer, constitutes the complete guide to creating a stimulating literature program that also gets students excited about pleasure reading, the kind of reading that best prepares students for understanding demanding academic texts. In other words, Donalyn Miller has solved one of the central problems in language education. —Stephen Krashen, professor emeritus, University of Southern California

More Common Sense Online Texas Holdem Jack D. Mormon,2012-04-10 This is the second poker book by Mormon. Following a year of playing after publishing his first, he feels that he has gained enough information and experience to warrant a second. He is a self-proclaimed lover of the game of Texas Holdem. In his own words, Im only sorry that I didnt begin playing Holdem until I was almost 60. I somewhat pessimistically calculate that this leaves me only 50 years or so to play and improve my game. Now it may be that Holdem is played in the hereafter. If it is played only in Hell, Im probably in

good shape. If, on the other hand, its only played in Heaven I need to get my act together.

**Finding a Way to the Top** RANDOLPH W. CAMERON,2004-11-09 Many people will fail at their first and second attempts to be successful in a corporation, not because they lack the academic skills or the technical know-how. They will fail because they lack the knowledge and experience to deal with the discipline of corporate culture. Black, Hispanic, and Asian women and men are more visible than ever on the corporate ladder, yet they often find that it takes more than talent and ambition to climb to the top. This step-by-step guide in paperback tells you what you need to know to not only survive, but to thrive in todays job market. In that position, Mr. Cameron served such clients as Columbia Pictures, Mobile Oil, and the Government of Bermuda. Mr. Cameron has published a number of articles on profit and nonprofit management.

Common Sense Online Texas Holdem Jack D. Mormon,2011-05-17 The author began playing online Texas Holdem for entertainment and found that he greatly enjoyed the game. Once, however, he entered the world of real money play he found that he would win hands occasionally but always end up losing in the long run. Consulting the numerous books that are available didnt seem to help. Finally he undertook a crusade to discover what was wrong with his game. This book is the result of that crusade.

**Readicide** Kelly Gallagher, 2023-10-10 Read-i-cide: The systematic killing of the love of reading, often exacerbated by the inane, mind-numbing practices found in schools. Reading is dying in our schools. Educators are familiar with many of the factors that have contributed to the decline, poverty, second-language issues, and the ever-expanding choices of electronic entertainment. In this provocative book *Readicide: How Schools are Killing Reading and What You Can Do About It*, author and teacher Kelly Gallagher suggests it is time to recognize a new and significant contributor to the death of reading: our schools. *Readicide*, Gallagher argues that American schools are actively (though unwittingly) furthering the decline of reading. Specifically, he contends that the standard instructional practices used in most schools are killing reading by: Valuing standardized testing over the development of lifelong readers Mandating breadth over depth in instruction Requiring students to read difficult texts without proper instructional support and insisting students focus on academic texts Ignoring the importance of developing recreational reading Losing sight of authentic instruction in the looming shadow of political pressures *Readicide* provides teachers, literacy coaches, and administrators with specific steps to reverse the downward spiral in reading-; steps that will help prevent the loss of another generation of readers.

**Foods for Health** National Heart, Lung, and Blood Institute. Foods for Health Project Group, 1983 Abstract: The description and findings of a 1-year nutrition education project conducted cooperatively by the US National Heart, Lung, and Blood Institute and by Giant Food are reported. The project was conducted to increase consumer awareness and knowledge about the relationships of nutrition to cardiovascular risk, and to provide practical ways for dietary improvement and cardiovascular disease prevention. The primary nutrition information vehicles were a bi-weekly brochure (the *Eater's Almanac*) of which over 2 million copies were distributed and shelf signs. Program evaluation was made via telephone surveys of shoppers, food purchase data from the computer-assisted checkout system in 20 supermarkets, and a completed questionnaire. A gain in correct scores was noted for questions on fat and cholesterol in foods and on the relationship between dietary fat and serum cholesterol levels; the scores appeared to be related to respondent characteristics of sex, education, age and having a family member on a special diet. Changes in overall food sales trends were similar in the 2 study areas (Washington, D.C. and Baltimore, MD). (wz).
