Paved Paradise Henry Grabar, 2023-05-09 Shortlisted for the Zócalo Book Prize Named one of the best books of the year by The New Yorker and The New Republic “Consistently entertaining and often downright funny.” —The New Yorker “Wry and revelatory.” —The New York Times A romp, packed with tales of anger, violence, theft, lust, greed, political chicanery and transportation policy gone wrong . . . highly entertaining. —The Los Angeles Times An entertaining, enlightening, and utterly original investigation into one of the most quietly influential forces in modern American life—the humble parking spot. Parking, quite literally, has a death grip on America: each year a shocking number of Americans kill one another over parking spots, and we routinely do ridiculous things for parking, contorting our professional, social, and financial lives to get a spot. Since the advent of the car, we have deformed our cities in a Sisyphean quest for car storage, and as a result, much of the nation’s most valuable real estate is now devoted to empty vehicles. Parking determines the design of new buildings and the fate of old ones, traffic patterns and the viability of transit, neighborhood politics and municipal finance, and the overall quality of public space. Is this really the best use of our finite resources? Is parking really more important than everything else? In a beguiling and absurdly hilarious mix of history, politics, and reportage, Slate staff writer Henry Grabar brilliantly surveys the nation’s parking crisis, revealing how the compulsion for car storage has exacerbated some of our most acute problems— from housing affordability to the accelerating global climate disaster—and, ultimately, how we can free our cities from parking’s cruel yoke.

Power Metal Vince Beiser, 2024-11-19 The powerful ways the metals we need to fuel technology and energy are spawning environmental havoc, political upheaval, and rising violence — and how we can do better. An Australian millionaire’s plan to mine the ocean floor. Nigerian garbage pickers risking their lives to salvage e-waste. A Bill Gates-backed entrepreneur harnessing AI to find metals in the Arctic. These people and millions more are part of the intensifying competition to find and extract the minerals essential for two crucial technologies: the internet and renewable energy. In *Power Metal*, Vince Beiser explores the Achilles’ heel of “green power” and digital technology – that manufacturing computers, cell phones, electric cars, and other technologies demand skyrocketing amounts of lithium, copper, cobalt, and other materials. Around the world, businesses and governments are scrambling for new places and new ways to get those metals, at enormous cost to people and the planet. Beiser crisscrossed the world to talk to the people involved and report on the damage this race is inflicting, the ways it could get worse, and how we can minimize the damage. *Power Metal* is a compelling glimpse into this disturbing yet potentially promising new world.

Right to the Road Joseph A. Rodriguez, 2024-07-08 Car ownership is central to the U.S. culture wars about global warming and urban sprawl. While the environmental issues surrounding car use are well known, the car is also the focus of debates about urban redevelopment, racially biased policing, women’s employment, immigration, homelessness, and disability rights. *Right to the Road: How Marginalized American Motorists Fought to Drive and Park* by Joseph A. Rodriguez

discusses the central role of automobiles to determine how enforced automobile regulations have affected marginalized Americans both in the past and present day. Each chapter focuses on issues such as: Milwaukee's parking policies after World War II and urban redevelopment; Chicago's traffic and parking policies and the post-war rise in crime; white and Black women's increased employment post-war and the harassment they endured by police officers and motorists; the policing of Latino drivers and how anti-immigrant activists sensationalized automobile accidents to demonize Latinos as criminals; the disabled communities push for driving rights; the debates in cities and suburbs over the right to park overnight in safe parking spaces; and the use of the automobile and parking lots during the COVID-19 pandemic. This book highlights the various roles of the car in society throughout history.

The Social and Legal Impact of Autonomous Vehicles Guy Seidman, Aviv Gaon, 2025-01-09 This book explores the legal and societal implications of autonomous vehicles (AVs), drawing on historical examples of disruptive technologies and the complex process of their adoption. Employing broad interdisciplinary perspectives, Guy Seidman and Aviv Gaon imagine how the socio-cultural perception of AVs might develop and how they could fit into the urban landscape.

The Green Fuse Peter Dale, 2025-06-12 Dig deep into our powerful connection with gardens across media and realms of human experience—from music to philosophy, painting to religion. Why do interiors of houses mimic nature—the wallpapers and curtains, flowers in vases, a vaporizer in the bathroom? Why do we so often connect our childhoods with gardens? Why has the myth of a lost Eden been so ubiquitous and so formative? *The Green Fuse: Essays in Making Sense of Gardens* explores our deep-rooted impulses to create gardens, examining them through the lenses of history, religion, nostalgia, and myth. It connects gardens with the other arts—painting, music, literature, and theater—and contemplates their intellectual and philosophical significance. Blending lyrical reflections with research, *The Green Fuse* offers an unusually wide-ranging and thoughtful perspective on gardens and why we make them. It will be ideal for all readers interested in gardening and its cultural implications.

Movement Nicole Gelinas, 2024-11-05 A gripping account of how the automobile has failed NYC and how mass transit and a revitalized streetscape are vital to its post-pandemic recovery In 1969, as all students of New York City history think they have learned, master builder Robert Moses lost his long battle to urbanist Jane Jacobs over his planned Lower Manhattan Expressway. The ten-lane elevated expressway would have sliced across SoHo and Little Italy, demolishing historic buildings, and displacing thousands of families and businesses. Jacobs and her neighbors defeated Moses, and as a result, New York became the only major American city with no interstate highway running through its core. Like many global cities, though, New York had spent fifty years during the first half of the twentieth century trying and failing to tame its heavily populated landscape to fit the private automobile. New York has now spent more than fifty years trying to undo those mistakes, wresting back city space for people, not cars. *Movement: New York's Long War to Take Back Its Streets* from the

Car chronicles the earlier, less-known battles that preceded the cancellation of the Lower Manhattan Expressway: Jacobs became an example for generations of urban planners, but whose example did Jacobs emulate in an earlier victory that saved Washington Square Park? Moses may serve handily as New York's uber-villain now, but who, before him, was responsible for destroying a critical part of New York's transit system? A well respected urban writer who has focused on New York's transportation system for more than a decade, author Nicole Gelinas resumes the story where Robert Caro's landmark *The Power Broker* ended. *Movement* explores how, in the half-century leading up to the COVID-19 pandemic, New York's re-embrace of its mass-transit system and a livable streetscape helped save the city. Gelinas tackles the 1970s environmental movement, the 1980s rebuilding of the subways, and more contemporary battles, from Mayor Bloomberg's push for more pedestrian plazas and bike lanes in the early 2000s, to transportation advocates' protests to prevent traffic deaths in the Mayor de Blasio era of the 2010s, to how New York's stewardship of its streets and subways have played a critical role during the 2020 pandemic and subsequent recovery. Introducing a cast of transportation heroes to rival Jane Jacobs (Shirley Hayes, Hazel Henderson, Richard Ravitch, Nilka Martell) and puncturing the myth of Moses as New York's anti-hero, *Movement* explores how New York City has helped redefine what it means to be a global city: not a place that is easy to drive through, but a place where people can take transit, walk, and bike to work, to school, or just for fun.

Human Transit, Revised Edition Jarrett Walker, 2024-02-06 The first edition of *Human Transit*, published in 2011, has become a classic for professionals, advocates, and interested citizens. Walker has updated and expanded the book to deepen its explanations. New topics include the problem with specialization; the role of flexible or demand response services; how to know when to redesign your network; and responding to tech-industry claims that transit will soon be obsolete. Finally, he has also added a major new section exploring the idea of access to opportunity as a core measure of transit's success. No other book explains the basic principles of public transit in such lively and accessible prose, all based on a respect for your right to form your own opinion. Walker's goal is not to make you share his values, but to give you the tools to clarify and advocate for yours.

Inventing Paradise Paul Haddad, 2024-06-18 *Inventing Paradise: The Power Brokers Who Created the Dream of Los Angeles* traces the improbable rise of Los Angeles through the prism of six visionaries who had outsize influence on the city's growth: Phineas Banning, Harrison Gray Otis, Henry Huntington, Harry Chandler, William Mulholland, and Moses Sherman. In the late 1870s, Los Angeles was a violent, dusty, 29-square-mile pueblo with a few thousand souls, largely unchanged since its founding in 1781. By 1930, its size had swelled to within 96% of its current 468 square miles, housing a staggering 1.2 million people. In just 50 years, L.A. had joined the ranks of other world-class cities. In the tradition of Mike Davis's classic work *City of Quartz*, Paul Haddad (*Freewaytopia* and *10,000 Steps a Day in L.A.*) debunks many myths about the City of Angels with a wildly entertaining narrative that sheds new light on the fascinating birth of modern Los Angeles. Power

came from a select few, whose triumphs, scandals, and correspondence are well documented in *Inventing Paradise*, along with other little-known facts about L.A. history, including: How Los Angeles Times chief Harry Chandler pushed eugenics and endorsed “white spots” Henry Huntington’s and Moses Sherman’s trolley systems and the extortion-type practices that led to their expansion When Los Angeles was so desperate for water, it hired a miracle worker who promised rain How L.A.’s power elite peddled the lie that the Owens River used to flow into Los Angeles and rightfully belonged to the city When Los Angeles annexed a city in which monkeys cast votes How Venice, California, was not the first Venice, California William Mulholland’s game-changing construction of the Los Angeles Aqueduct, which raised the city’s population ceiling from 250,000 to 2.5 million Haddad also covers the heavy costs that came with creating paradise in such a short period of time, including car dependency, environmental problems, and deep-seated inequities between wealthy white Angelenos and people of color due to racist policies. All have left an imprint on present-day Los Angeles. Los Angeles is known as a city that should not exist—and yet it does. Through *Inventing Paradise*, Haddad shows readers that Los Angeles is not a paradise found, but a paradise that was willed into existence, owing to the collective vision of these six Gilded Era-born tycoons.

Stuck Yoni Appelbaum, 2025-02-18 How did America cease to be the land of opportunity? We take it for granted that good neighborhoods—with good schools and good housing—are only accessible to the wealthy. But in America, this wasn’t always the case. Though for most of world history, your prospects were tied to where you were born, Americans came up with a revolutionary idea: If you didn’t like your lot in life, you could find a better location and reinvent yourself there. Americans moved to new places with unprecedented frequency, and, for two hundred years, that remarkable mobility was the linchpin of American economic and social opportunity. In this illuminating debut, Yoni Appelbaum, historian and journalist for *The Atlantic*, shows us that this idea has been under attack since reformers first developed zoning laws to ghettoize Chinese Americans in nineteenth-century Modesto, California. The century of legal segregation that ensued—from the zoning laws enacted to force Jewish workers back into New York’s Lower East Side to the private-sector discrimination and racist public policy that trapped Black families in Flint, Michigan to Jane Jacobs’ efforts to protect her vision of the West Village—has raised housing prices, deepened political divides, emboldened bigots, and trapped generations of people in poverty. Appelbaum shows us that these problems have a common explanation: people can’t move as readily as they used to. They are, in a word, stuck. Cutting through more than a century of mythmaking, *Stuck* tells a vivid, surprising story of the people and ideas that caused our economic and social sclerosis and lays out common-sense ways to get Americans moving again.

Urban Geography David Kaplan, Steven Holloway, 2024-07-18 Provides a comprehensive and up-to-date treatment of Urban Geography The leading undergraduate textbook on the subject, *Urban Geography* covers the origins, historical development, and contemporary challenges of cities and metropolitan areas around the world. Incorporating the most recent research in urban studies, authors David H. Kaplan and Steven R. Holloway provide an overview of the dynamic field,

introduce key elements of urban theory and methodology, analyze issues of immigration, ethnicity, and urbanism, and more. Exploring the urban experience in a global context, 16 student-friendly chapters address urbanization processes, industrial urbanization, discrimination in the housing market, gentrification, metropolitan governance, urban planning, geographical and political fragmentation, urban immigration, urban-economic restructuring, and more. Each chapter includes an introductory road map, learning objectives, definitions of key terms, discussion questions, and suggestions for research topics and activities. The fourth edition of Urban Geography contains two entirely new chapters on urban transportation and the relationship between cities and the environment, including climate change and natural disasters. New discussion of the impact of COVID-19 and other health aspects of cities is accompanied by new data, new figures, new themes, and new pedagogical tools. In this edition, the authors present traditional models of urban social space and new factors that organize intra-urban space, such as globalization and postmodernism. Examining cities in the developed world and in less developed regions, Urban Geography, Fourth Edition, is the ideal textbook for Urban Geography classes and related courses in Urban Studies, Sociology, and Political Science programs.

Carmageddon Daniel Knowles, 2023-03-28 A high-octane polemic against cars—which are ruining the world, while making us unhappy and unhealthy—from a talented young writer at the Economist. “Briskly written, well researched, and with a knack for landing the significant statistic right after the crisply summarized argument.” —The New Yorker The automobile was one of the most miraculous inventions of the 20th century. It promised freedom, style, and utility. But

sometimes, rather than improving our lives, technology just makes everything worse. Over the past century, cars have filled the air with toxic pollutants and fueled climate change. Cars have stolen public space and made our cities uglier, dirtier, less useful, and more unequal. Cars have caused tens of millions of deaths and injuries. They have wasted our time and our money. In *Carmageddon*, journalist Daniel Knowles outlines the rise of the automobile and the costs we all bear as a result. Weaving together history, economics, and reportage, he traces the forces and decisions that normalized cars and cemented our reliance on them. Knowles takes readers around the world to show the ways car use has impacted people's lives—from Nairobi, where few people own a car but the city is still cloaked in smog, to Houston, where the Katy Freeway has a mind-boggling 26 lanes and there are 30 parking spaces for every resident, enough land to fit Paris ten times. With these negatives, Knowles shows that there are better ways to live, looking at Amsterdam, Copenhagen, Tokyo, and New York City.

Owning the Street Amelia Thorpe, 2020-12-15 How local, specific, and personal understandings about belonging, ownership, and agency intersect with law to shape the city. In *Owning the Street*, Amelia Thorpe examines everyday experiences of and feelings about property and belonging in contemporary cities. She grounds her account in an empirical study of PARK(ing) Day, an annual event that reclaims street space from cars. A popular and highly recognizable example of DIY Urbanism, PARK(ing) Day has attracted considerable media attention, but has not yet been the subject of close scholarly examination. Focusing on the event's trajectories in San Francisco, Sydney, and Montreal, Thorpe addresses this gap, making use of extensive interview data, field work, and careful reflection to explore these tiny, temporary, and often transformative interventions.

Smart Energy Practices for a Sustainable World Nina S. Godbole ,John P. Lamb ,2023-06-13 Mankind has scaled unprecedented growth since the advent of the Industrial Revolution. However, this progress has come at the hefty cost of environmental degradation. Climate change, undeniably, is one of the biggest challenges of the planet Earth and is largely anthropogenic. In the modern-world context, the phenomenon of climate change is one of the most defining issues, when it comes to realizing objectives of the Sustainable Development Goals (SDGs). Climate change is not limited to geographical boundaries, it is a global problem, hence requires global solutions. It has been widely discussed and therefore has acquired centre stage across the major world forums. *Smart Energy Practices for a Sustainable World: how we all can contribute?* stresses the need for us to judiciously, sustainably, and smartly harness and use energy techniques in order to effectively combat climate change. The book also gives an in-depth discussion on utilization of artificial intelligence and information technology to realize energy efficiency in various sectors of economy including but not limited to transportation, buildings, infrastructure, health care, and other services. Text is supplemented by case studies that depict ground-level reality to facilitate comprehension of the subject matter. The appendices serve as an extended learning of the concepts discussed in the chapters. The publication would serve as a valuable reference for both scholars and researchers engaged in the domain,

in addition to, being a guide to industry as well as the academic world. Table of Contents: 1. Smart, Sustainable, and Green: the mantra to save our planet 2. Smart Energy Systems and Components 3.
