What's Queer about Europe? Mireille Rosello, Sudeep Dasgupta, 2014-02-03 What's Queer about Europe? examines how queer theory helps us initiate disorienting conjunctions and counterintuitive encounters for imagining historical and contemporary Europe. This book queers Europe and Europeanizes queer, forcing a reconsideration of both. Its contributors study Europe relationally, asking not so much what Europe is but what we do when we attempt to define it. The topics discussed include: gay marriage in Renaissance Rome, Russian anarchism and gender politics in early-twentieth-century Switzerland, colonialism and sexuality in Italy, queer masculinities in European popular culture, queer national identities in French cinema, and gender theories and activism. What these apparently disparate topics have in common is the urgency of the political, legal, and cultural issues they tackle. Asking what is queer about Europe means probing the blind spots that continue to structure the long and discrepant process of Europeanization.

Magical Practice in the Latin West Richard Lindsay Gordon, Francisco Marco Simón, 2010 Most studies of Graeco-Roman magic focus on the Greek texts. Stimulated by important recent finds of Latin curse-tablets, this collection of essays for the first time tries to define the nature and extent of the originality of magical practice in the Latin West

Geography and Revolution David N. Livingstone, Charles W. J. Withers, 2005-12-15 A term with myriad associations, revolution is commonly understood in its intellectual, historical, and sociopolitical contexts. Until now, almost no attention has been paid to revolution and questions of geography. Geography and Revolution examines the ways that place and space matter in a variety of revolutionary situations. David N. Livingstone and Charles W. J. Withers assemble a set of essays that are themselves revolutionary in uncovering not only the geography of revolutions but the role of geography in revolutions. Here, scientific revolutions—Copernican, Newtonian, and Darwinian—ordinarily thought of as placeless, are revealed to be rooted in specific sites and spaces. Technical revolutions—the advent of print, time-keeping, and photography—emerge as inventions that transformed the world's order without homogenizing it. Political revolutions—in France, England, Germany, and the United States—are notable for their debates on the nature of political institutions and national identity. Gathering insight from geographers, historians, and historians of science, Geography and Revolution is an invitation to take the where as seriously as the who and the when in examining the nature, shape, and location of revolutions.

Spain in Italy Thomas Dandeleit, John Marino, 2006-12-01 Nuanced understanding of the reciprocal nature of Spanish-Italian relations and the rich cultural production that was the product of the far-reaching exchanges between the two peninsulas throughout the early modern period guides the nineteen essays in this volume. The key political reality of sixteenth and seventeenth-century Spanish imperial domination in Italy—formal (Sicily, Sardinia, Naples, Milan), informal (Rome, Genoa, Tuscany), and more neutral or independent (Venice)—introduces the investigation in this volume into the methods and mechanisms of control and collaboration, cooperation and cooptation, assimilation and resistance. The connections between topics and problems in social, administrative, economic, and cultural history follow from political theory and practice. Politics, society, economy, and religion help us see both Spain and Italy more clearly.

To Govern Is to Serve Jacques Dalarun, 2023-02-15 To Govern Is to Serve explores the practices of collective governance in medieval religious orders that turned the precepts of the Gospels—most notably that the first will be last, the last will be first—into practices of communal deliberation and the election of superiors. Jacques Dalarun argues that these democratic forms have profoundly influenced modern experiences of democracy, in particular the idea of government not as domination but as service. Dalarun undertakes meticulous textual analysis and historical research into twelfth and thirteenth-century religious movements—from Fontevraud and the Paraclete of Abelard and Heloise through St. Dominic and St. Francis—that sought their superiors from among the less exalted members of their communities to chart how these experiments prefigured certain aspects of modern democracies, those allowing individuals to find their way forward as part of a collective. Wide ranging and deeply original, To Govern Is to Serve highlights the history of the reciprocal bonds of service and humility that underpin increasingly fragile democracies in the twenty-first century.

Chromatic Modernity Sarah Street, Joshua Yumibe, 2019-04-02 The era of silent film, long seen as black and white, has been revealed in recent scholarship as bursting with color. Yet the 1920s remain thought of as a transitional decade between early cinema and the rise of Technicolor—despite the fact that new color technologies used in film, advertising, fashion, and industry reshaped cinema and consumer culture. In Chromatic Modernity, Sarah Street and Joshua Yumibe provide a revelatory history of how the use of color in film during the 1920s played a key role in creating a chromatically vibrant culture. Focusing on the final decade of silent film, Street and Yumibe portray the 1920s as a pivotal and profoundly chromatic period of cosmopolitan exchange, collaboration, and experimentation in and around cinema. Chromatic Modernity

explores contemporary debates over color's artistic, scientific, philosophical, and educational significance. It examines a wide range of European and American films, including *Opus 1* (1921), *L'Inhumaine* (1923), *Die Nibelungen* (1924), *The Phantom of the Opera* (1925), *The Lodger* (1927), *Napoléon* (1927), and *Dracula* (1932). A comprehensive, comparative study that situates film among developments in art, color science, and industry, *Chromatic Modernity* reveals the role of color cinema in forging new ways of looking at and experiencing the modern world.

The Individual and Society in the Middle Ages Walter Ullmann, 2019-12-01 Originally published in 1966. *The Individual and Society in the Middle Ages*, based on three guest lectures given at Johns Hopkins University in 1965, explores the place of the individual in medieval European society. Looking at legal sources and political ideology of the era, Ullmann concludes that, for most of the Middle Ages, the individual was defined as a subject rather than a citizen, but the modern concept of citizenship gradually supplanted the subject model from the late Middle Ages onward. Ullmann lays out the theological basis of the political theory that cast the medieval individual as an inferior, abstract subject. The individual citizen who emerged during the late Middle Ages and the Renaissance, by contrast, was an autonomous participant in affairs of state. Several intellectual trends made this humanistic conception of the individual possible, among them the rehabilitation of vernacular writing during the thirteenth century and the growing interest in nature, natural philosophy, and natural law. However, Ullmann points to feudalism as the single most important medieval institution that laid the groundwork for the emergence of the modern citizen.

The Nation, Europe, and the World Hanna Schissler, Yasemin Nuhoğlu Soysal, 2005 Textbooks in history, geography & the social sciences provide important insights to the ways in which societies function. Based on case studies from Europe, Japan & the United States, this volume shows how concepts of space & time have changed people's view of their countries & of the world as a whole.

Time Machine Antonio Somaini, 2020-09-15 How cinema and video have transformed our perception of time The year 1895 saw two events, from which *Time Machine: Cinematic Temporality* takes its bearings: the publication of H.G. Wells' scientific romance *The Time Machine: An Invention*, the first literary work in which movement through time is made possible by technology; and the first public presentation, on the evening of December 28, 1895, of the Lumière Brothers' *Cinématographe*. Based on these two moments, *Time Machine* shows how cinema, video and video installations have transformed our perception of time through techniques of slow motion and acceleration, loops and reversals, time-lapse and

freeze-frame, multiple exposure and stop-motion animation, as well as through montage: that crucial act of separating and joining images and sounds which has often been considered as one of cinema's defining traits. The 11 texts in this volume shed new light on the aesthetic, epistemological, political and media-theoretical implications of cinematic time manipulation.

Excavating Modernity Joshua Arthurs, 2013-10-15 The cultural and material legacies of the Roman Republic and Empire in evidence throughout Rome have made it the Eternal City. Too often, however, this patrimony has caused Rome to be seen as static and antique, insulated from the transformations of the modern world. In *Excavating Modernity*, Joshua Arthurs dramatically revises this perception, arguing that as both place and idea, Rome was strongly shaped by a radical vision of modernity imposed by Mussolini's regime between the two world wars. Italian Fascism's appropriation of the Roman past—the idea of Rome, or *romanità*—encapsulated the Fascist virtues of discipline, hierarchy, and order; the Fascist new man was modeled on the Roman legionary, the epitome of the virile citizen-soldier. This vision of modernity also transcended Italy's borders, with the Roman Empire providing a foundation for Fascism's own vision of Mediterranean domination and a European New Order. At the same time, *romanità* also served as a vocabulary of anxiety about modernity. Fears of population decline, racial degeneration and revolution were mapped onto the barbarian invasions and the fall of Rome. Offering a critical assessment of *romanità* and its effects, Arthurs explores the ways in which academics, officials, and ideologues approached Rome not as a site of distant glories but as a blueprint for contemporary life, a source of dynamic values to shape the present and future.
