Conversation Analysis and Language Alternation Anna Filipi, Numa Markee, 2018-10-15 This volume brings together researchers in conversation analysis who examine the practice of alternating between English and German, Italian, Spanish, Swedish and Vietnamese in the classroom. The collection shows that language alternation is integral to being and learning to become a bilingual, and that being and learning to become a bilingual are accomplished through a remarkably common set of interactional objects and actions, whose sequential organisations are quite similar across languages and educational sectors. This volume therefore shows that having recourse to more than one shared language provides an important resource for getting the work of language learning and teaching done through an orderliness that can be described and evaluated. The findings and the suggested pedagogical applications described in the volume will be of significant interest to researchers and teachers in a range of fields including second and foreign language teaching and learning, conversation analysis, teacher education and bilingualism.

Testimonios: Stories of Latinx and Hispanic Mathematicians Pamela E. Harris, 2021-08-16 Testimonios brings together first-person narratives from the vibrant, diverse, and complex Latinx and Hispanic mathematical community. Starting with childhood and family, the authors recount their own individual stories, highlighting their upbringing, education, and career paths. Their particular stories, told in their own voices, from their own perspectives, give visibility to some of the experiences of Latinx/Hispanic mathematicians. Testimonios seeks to inspire the next generation of Latinx and Hispanic mathematicians by featuring the stories of people like them, holding a mirror up to our own community. It also aims to provide a window for mathematicians (and aspiring mathematicians) from all ethnicities, with the hope of inspiring a better understanding of the diversity of the mathematical community.
