The World Through Picture Books IFLA Libraries for Children and Young Adults Section, The World Through Picture Books (WTPB) is a programme of the IFLA Libraries for Children and Young Adults Section in collaboration with IBBY (International Board on Books for Young People) Children's Librarians all over the world understand how important picture books in both traditional and digital formats are for children, for their development, cultural identity and as a springboard into learning to read for themselves. The idea behind the World Through Picture Books was to create a selection of picture books from around the world that have been recommended by librarians, as a way of celebrating and promoting the languages, cultures and quality of children's book publishing globally. The 3rd edition highlights 530 picture books, from 57 countries and featuring 37 languages. It is fully digital and the catalogue as well as a poster and bookmark can be downloaded free of charge. --

A Book of Emblems Andrea Alciati, 2004-07-15 Andrea Alciati's *Emblematum Liber* was an essential work for every writer, artist and scholar in post-medieval Europe. First published in 1531, this illustrated book was a collection of emblems, each consisting of a motto or proverb, a typically enigmatic illustration, and a short explanation. Most of the emblems had symbolic and moral applications. Scholars depended on Alciati's book to interpret contemporary art and literature, while writers and artists turned to it to invest their work with an understood didactic sense. This new edition of the *Emblematum Liber* includes the original Latin texts, highly readable English translations, and the illustrations belonging to each of the 212 emblems. The editor's introduction explains both the importance and the cultural contexts of Alciati's book, as well as its innumerable artistic applications. For instance, close study of the emblems reveals--to cite only two examples--why statues of lions are traditionally placed before government buildings, and what underlying political message was conveyed by innumerable equestrian portraits during the Baroque era. The collection includes as an appendix the formerly suppressed emblem, *Adversus Naturam Peccantes*, accompanied by a translation of the learned commentary applied to it by Johann

Thuius in 1612. An extensive bibliography points the student to scholarly research specifically dealing with artistic applications of Alciati's emblems. Altogether, this new edition of Alciati's seminal work is an essential tool for modern students of the liberal arts.

The Crime of Claudius Ptolemy Robert R. Newton, 1977 In Newton's view, Ptolemy was the most successful fraud in the history of science. Newton shows that Ptolemy predominantly obtained the astronomical results described in his work *The Almagest* by computation, and not by the direct observations that Ptolemy described.

School Days Patrick Chamoiseau, 1997-01-01 *School Days (Chemin-d'Ecole)* is a captivating narrative based on Patrick Chamoiseau's childhood in Fort-de-France, Martinique. It is a revelatory account of the colonial world that shaped one of the liveliest and most creative voices in French and Caribbean literature today. Through the eyes of the boy Chamoiseau, we meet his severe, Francophile teacher, a man intent upon banishing all remnants of Creole from his students' speech. This domineering man is succeeded by an equally autocratic teacher, an Africanist and proponent of "Negritude." Along the way we are also introduced to Big Bellybutton, the class scapegoat, whose tales of Creole heroes and heroines, magic, zombies, and fantastic animals provide a fertile contrast to the imported French fairy tales told in school. In prose punctuated by Creolisms and ribald humor, Chamoiseau infuses the universal terrors, joys, and disappointments of a child's early school days with the unique experiences of a Creole boy forced to confront the dominant culture in a colonial school. *School Days* mixes understanding with laughter, knowledge with entertainment—in ways that will fascinate and delight readers of all ages.

Exploring the Dynamics of Multilingualism Anne-Claude Berthoud, François Grin, Georges Lüdi, 2013-12-17 This book addresses the meanings and implications of multilingualism and its uses in a context of rapid changes, in Europe and around the world. All types of organisations, including the political institutions of the European Union, universities and private-sector companies must rise to the many challenges posed by operating in a multilingual environment. This requires them, in particular, to make the best use of speakers' very diverse linguistic repertoires. The contributions in this volume, which stem from the DYLAN research project financed by the European Commission as part of its Sixth Framework Programme, examine at close range how these repertoires develop, how they change and how actors adapt skilfully the use of their repertoires to different objectives and conditions. These different strategies are also examined in terms of their capacity to ensure efficient and fair communication in a multilingual Europe. Careful observation of actors' multilingual practices reveals finely tuned communicational strategies drawing on a wide range of different languages, including national languages, minority languages and *lingue franche*. Understanding these practices, their meaning and their implications, helps to show in what

way and under what conditions they are not merely a response to a problem, but an asset for political institutions, universities and business.

Thoughts on Unconventional Computing Andrew Adamatzky,Louis-Jose Lestocart,2021-02-28 There is no strict definition of unconventional computing. Being an unconventional computist is not a matter of training but thinking and living. Phenomenologically most works on unconventional computing are about implementation of computing in novel substrates (chemical, physical, biological), development of computing schemes and algorithms not fitting into the mainstream framework, or designing of computing architectures inspired by chemical or biological systems. This short book gives a snapshot of the unconventional computing field. The world-leading experts in the unconventional computing author all articles of the issue. The topics include analog computation, sensing and computing with fungi, chemical computing, swarms of minimalist agents, computational universality, mega-computing in the universe, information and music, universal sensing, art of deduction, reversible computing, philosophy of machine learning, epistemic incompleteness, post-quantum unconventional computing, complexity of natural computing, arts and cellular automata. Articles presented are punchy and well illustrated. All articles are short and self-contained. The book will serve well as a light-touch introduction to unconventional computing for people not familiar with computing and might inspire artists and humanitarians to enter the field.

William Langland's Piers Plowman Kathleen M. Hewett-Smith,2001 William Langland's chief work, *Piers Plowman*, is regarded as the greatest Middle English poem prior to Chaucer's *Canterbury Tales*. Both a social satire and a vision of simple Christian life, it has much to contribute to contemporary debates over such issues as gender, dissent, representation, and popular religion and culture, and it has recently enjoyed renewed critical attention. This volume tackles some of the central

questions within Piers Plowman studies. Its essays, ranging from source study to critical historicism and queer theory, demonstrate the variety of critical tools presently brought to bear upon medieval texts, but they also share a common interest in social context and meaning. What all of the contributors insist upon is the need for a fundamental reconfiguring of our most basic understandings of Piers Plowman -- of its author and audience; the order of its texts; the power of its poetry; its understanding of women, of the poor, of allegory, of history itself; and its relation to fourteenth-century culture and ideology.

Edward the Emu Sheena Knowles, 1998-04-04 Edward the emu was sick of the zoo, There was nowhere to go, there was nothing to do, And compared to the seals that lived right next door, Well being an emu was frankly a bore. Tired of his life as an emu, Edward decides to try being something else for a change. He tries swimming with the seals. He spends a day lounging with the lions. He even does a stint slithering with the snakes. But Edward soon discovers that being an emu may be the best thing after all. And so he returns to his pen, only to find a big surprise awaiting him. . . . Edward is tired of being an emu, so he decides to try being something else for a change. So he heads back to his pen, only to find a big surprise awaiting him . . . Sheena Knowles' upbeat, rhyming text and Rod Clement's deliciously droll illustrations are sure to make readers laugh out loud in this whimsical picture book by the creators of Edwina the Emu. Mexico Reading the United States Linda Egan, Mary K. Long, 2009 The thirteen original essays in this collection explore the Mexican point of view from the 1920s to the present in order to register often unheard voices in the complex cross-border, cross-cultural reality shared by the two nations. The contributors, all of whom have personal experience with the challenges of bi-cultural and bi-national living, discuss travel writing, novels, film, essays, political cartoons, and Mexican sociocultural movements. In a time of ever-increasing migration of capital and human beings, this book turns on its head the usual perspective of U.S. economic and cultural dominance in order to deepen understanding of the bi-national relationship.
