Organized Crime Klaus von Lampe, 2015-07-16 *Organized Crime: Analyzing Illegal Activities, Criminal Structures, and Extra-legal Governance* provides a systematic overview of the processes and structures commonly labeled “organized crime,” drawing on the pertinent empirical and theoretical literature primarily from North America, Europe, and Australia. The main emphasis is placed on a comprehensive classificatory scheme that highlights underlying patterns and dynamics, rather than particular historical manifestations of organized crime. Esteemed author Klaus von Lampe strategically breaks the book down into three key dimensions: (1) illegal activities, (2) patterns of interpersonal relations that are directly or indirectly supporting these illegal activities, and (3) overarching illegal power structures that regulate and control these illegal activities and also extend their influence into the legal spheres of society. Within this framework, numerous case studies and topical issues from a variety of countries illustrate meaningful application of the conceptual and theoretical discussion.

The Emblematics of the Self Elizabeth B. Bearden, 2012 The ancient Greek romances of Achilles Tatius and Heliodorus were widely imitated by early modern writers such as Miguel de Cervantes, Philip Sidney, and Mary Wroth. Like their Greek models, Renaissance romances used ekphrasis, or verbal descriptions of visual representation, as a tool for characterization. *The Emblematics of the Self* shows how the women, foreigners, and non-Christians of these tales reveal their identities and desires in their responses to the 'verbal pictures' of romance. Elizabeth B. Bearden illuminates how 'verbal pictures' enliven characterization in English, Spanish, and Neolatin romances from 1552 to 1621. She notes the capacity for change among characters -- such as cross-dressed Amazons, shepherdish princesses, and white Mauritians -- who traverse transnational cultural and aesthetic environments. Engaging and rigorous, *The Emblematics of the Self* breaks new ground in understanding hegemonic and cosmopolitan European conceptions of the 'other,' as well as new possibilities for early modern identities, in an increasingly global Renaissance.

Monstrous Kinds Elizabeth Bearden, 2019-01-04 *Monstrous Kinds* is the first book to explore textual representations of disability in the global Renaissance. Elizabeth B. Bearden contends that monstrosity, as a precursor to modern concepts of disability, has much to teach about our tendency to inscribe disability with meaning. Understanding how early modern writers approached disability not only provides more accurate genealogies of disability, but also helps nuance current aesthetic and theoretical disability formulations. The book analyzes the cultural valences of early modern disability across a

broad national and chronological span, attending to the specific bodily, spatial, and aesthetic systems that contributed to early modern literary representations of disability. The cross section of texts (including conduct books and treatises, travel writing and wonder books) is comparative, putting canonical European authors such as Castiglione into dialogue with transatlantic and Anglo-Ottoman literary exchange. Bearden questions grand narratives that convey a progression of disability from supernatural marvel to medical specimen, suggesting that, instead, these categories coexist and intersect.

A Man of Honor Joseph Bonanno, 2013-06-04 Friendships, connections, family ties, trust, loyalty, obedience-this was the 'glue' that held us together. These were the principles that the greatest Mafia Boss of Bosses, Joseph Bonnano, lived by. Born in Castellammare del Golfo, Sicily, Bonnano found his future amid the whiskey-running, riotous streets of Prohibition America in 1924, when he illegally entered the United States to pursue his dreams. By the age of only twenty-six, Bonnano became a Don. He would eventually take over the New York underworld, igniting the Castellammarese War, one of the bloodiest Family battles ever to hit New York City... Now, in this candid and stunning memoir, Joe Bonanno-likely a model for Don Corleone in the blockbuster movie *The Godfather*-takes readers inside the world of the real Mafia. He reveals the inner workings of New York's Five Families-Bonanno, Gambino, Profaci, Lucchese, and Genovese-and uncovers how the Mafia not only dominated local businesses, but also influenced national politics. A fascinating glimpse into the world of crime, *A Man of Honor* is an unforgettable account of one of the most powerful crime figures in America's history.

Fictional Traces: Receptions of the Ancient Novel Volume 1 Marília Futre Pinheiro, S. J. Harrison, 2011 The study of the reception of the ancient novel and of its literary and cultural heritage is one of the most appealing issues in the story of this literary genre. In no other genre has the vitality of classical tradition manifested itself in such a lasting and versatile manner as in the novel. However, this unifying, centripetal quality also worked in an opposite direction, spreading to and contaminating future literatures. Over the centuries, from Antiquity to the present time there have been many authors who drew inspiration from the Greek and Roman novels or used them as models, from Cervantes to Shakespeare, Sydney or Racine, not to mention the profound influence these texts exercised on, for instance, sixteenth-to eighteenth-century Italian, Portuguese and Spanish literature. Volume I is divided into sections that follow a chronological order, while Volume II deals with the reception of the ancient novel in literature and art. The first volume brings together an international group of scholars whose main aim is to analyse the survival of the ancient novel in the ancient world and in the Middle Ages, in the Renaissance, in the 17th and 18th centuries, and in the modern era. The contributors to the second volume have undertaken the task of discussing the survival of the ancient novel in the visual arts, in literature and in the performative arts. The papers assembled in these two volumes on reception are at the forefront of scholarship in the field and will stimulate scholarly research on the ancient novel and its influence over the centuries up to modern times, thus enriching not only Classics but also modern languages and literatures, cultural history, literary theory and comparative literature.--

Molecular Genetic Pathology Liang Cheng, David Y. Zhang, John N. Eble, 2013-03-05 Molecular Genetic Pathology, Second Edition presents up-to-date material containing fundamental information relevant to the clinical practice of molecular genetic pathology. Fully updated in each area and expanded to include identification of new infectious agents (H1N1), new diagnostic biomarkers and biomarkers for targeted cancer therapy. This edition is also expanded to include the many new technologies that have become available in the past few years such as microarray (AmpliChip) and high throughput deep sequencing, which will certainly change the clinical practice of molecular genetic pathology. Part I examines the clinical aspects of molecular biology and technology, genomics. Pharmacogenomics and proteomics, while Part II covers the clinically relevant information of medical genetics, hematology, transfusion medicine, oncology, and forensic pathology. Supplemented with many useful figures and presented in a helpful bullet-point format, Molecular Genetic Pathology, Second Edition provides a unique reference for practicing pathologists, oncologists, internists, and medical geneticists. Furthermore, a book with concise overview of the field and highlights of clinical applications will certainly help those trainees, including pathology residents, genetics residents, molecular pathology fellows, internists, hematology/oncology fellows, and medical technologists in preparing for their board examination/certification.

The Black Sun Stanton Marlan, 2008-05-08 Also available in an open-access, full-text edition at <http://oaktrust.library.tamu.edu/handle/1969.1/86080> The black sun, an ages-old image of the darkness in individual lives and in life itself, has not been treated hospitably in the modern world. Modern psychology has seen darkness primarily as a negative force, something to move through and beyond, but it actually has an intrinsic importance to the human psyche. In this book, Jungian analyst Stanton Marlan reexamines the paradoxical image of the black sun and the meaning of darkness in Western culture. In the image of the black sun, Marlan finds the hint of a darkness that shines. He draws upon his clinical experiences—and on a wide range of literature and art, including Goethe's Faust, Dante's Inferno, the black art of Rothko and Reinhardt—to explore the influence of light and shadow on the fundamental structures of modern thought as well as the contemporary practice of analysis. He shows that the black sun accompanies not only the most negative of psychic experiences but also the most sublime, resonating with the mystical experience of negative theology, the Kabbalah, the Buddhist notions of the void, and the black light of the Sufi Mystics. An important contribution to the understanding of

alchemical psychology, this book draws on a postmodern sensibility to develop an original understanding of the black sun. It offers insight into modernity, the act of imagination, and the work of analysis in understanding depression, trauma, and transformation of the soul. Marlan's original reflections help us to explore the unknown darkness conventionally called the Self. Gothic Modernisms A. Smith, J. Wallace, 2001-05-04 This is the first full length exploration of the relationship between Gothic fiction and Modernism in fiction and film. The Gothic's fascination with images of the fragmented self is echoed in the Modernist concern with the psyche and the paranoia of the everyday. The contributors explore how the Gothic influences a range of writers including James Joyce, D.H. Lawrence, Virginia Woolf, May Sinclair, Elizabeth Bowen and Djuna Barnes.

Recovering Disability in Early Modern England David Houston Wood, 2020-07-06 While early modern selfhood has been explored during the last two decades via a series of historical identity studies involving class, race and ethnicity, and gender and sexuality, until very recently there has been little engagement with disability and disabled selves in sixteenth- and seventeenth-century England. This omission is especially problematic insofar as representations of disabled bodies and minds serve as some of the signature features in English Renaissance texts. *Recovering Disability in Early Modern England* explores how recent conversations about difference in the period have either overlooked or misidentified disability representations. It also presents early modern disability studies as a new theoretical lens that can reanimate scholarly dialogue about human variation and early modern subjectivities even as it motivates more politically invested classroom pedagogies. The ten essays in this collection range across genre, scope, and time, including examinations of real-life court dwarfs and dwarf narrators in Edmund Spenser's poetry; disability in Aphra Behn's assessment of gender and femininity; disability humor, Renaissance jest books, and cultural ideas about difference; madness in revenge tragedies; Spenserian allegory and impairment; the materiality of literary blindness; feigned disability in Jonsonian drama; political appropriation of Richard III in the postcommunist Czech Republic; the Book of Common Prayer's textual accommodation for cognitive disability; and Thomas Hobbes's and John Locke's inherently ableist conceptions of freedom and political citizenship.

Teaching Islam Jenny Berglund,

The Bird's Nest Shirley Jackson, 2014-01-28 Shirley Jackson's third novel, a chilling descent into multiple personalities Elizabeth is a demure twenty-three-year-old willing her life away at a dull museum job, living with her neurotic aunt, and subsisting off her dead mother's inheritance. When Elizabeth begins to suffer terrible migraines and backaches, her aunt takes her to the doctor, then to a psychiatrist. But slowly, and with Jackson's characteristic chill, we learn that Elizabeth is not just one girl—but four separate, self-destructive personalities. *The Bird's Nest*, Jackson's third novel, develops hallmarks of the horror master's most unsettling work: tormented heroines, riveting familial mysteries, and a disquieting vision inside

the human mind. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. Clash of Civilizations Over an Elevator in Piazza Vittorio Amara Lakhous, 2008-09-30 The immigrant tenants of a building in Rome offer skewed accounts of a murder in this prize-winning satire by the Algerian-born Italian author (Publishers Weekly). Piazza Vittorio is home to a polyglot community of immigrants who have come to Rome from all over the world. But when a tenant is murdered in the building's elevator, the delicate balance is thrown into disarray. As each of the victim's neighbors is questioned by the police, readers are offered an all-access pass into the most colorful neighborhood in contemporary Rome. With language as colorful as the neighborhood it describes, each character takes his or her turn "giving evidence." Their various stories reveal much about the drama of racial identity and the anxieties of a life spent on society's margins, but also bring to life the hilarious imbroglios of this melting pot Italian culture. "Their frequently wild testimony teases out intriguing psychological and social insight alongside a playful whodunit plot." —Publishers Weekly

Handbook of Contemporary Paganism Murphy Pizza, James R. Lewis, 2009 Contemporary Paganism is a movement that is still young and establishing its identity and place on the global religious landscape. The members of the movement are simultaneously growing, unifying, and maintaining its characteristic diversity of traditions, identities, and rituals. The modern Pagan movement has had a restless formation period but has also been the catalyst for some of the most innovative religious expressions, praxis, theologies, and communities. As Contemporary Paganism continues to grow and mature, new angles of inquiry about it have emerged and are explored in this collection. This examination and study of contemporary Paganism contributes new ways to observe and examine other religions, where innovations, paradoxes, and inconsistencies can be more accurately documented and explained.

News Networks in Early Modern Europe Joad Raymond, Noah Moxham, 2016-07 In *News Networks* 35 scholars from 10 countries give a new account of the history of European news, emphasising its transnational character and the international transmission of forms and modes of news as well as information.

Disorganized Crime Peter Reuter, 1983 Winner of the 1984 Leslie T. Wilkins Award for the best book in criminology and criminal justice. Bookmaking, numbers, and loansharking are reputed to be major sources of revenue for organized crime, controlled by the visible hand of violence. For years this belief has formed the basis of government policy toward illegal markets. Drawing on police files, confiscated records, and interviews with police, prosecutors, and criminal informants,

Reuter systematically refutes the notion that the Mafia, by using political connections and the threat of violence, controls the major illegal markets. Instead, he suggests that the cost of suppressing competition has ensured that these markets are populated with small enterprises, many of them marginal and ephemeral. Peter Reuter is a Senior Economist at the Rand Corporation. Disorganized Crime is included in The MIT Press Series on Organization Studies, edited by John Van Maanen.

Clinical Genomics, Second Edition Shashikant Kulkarni, Somak Roy, 2023-05-01 Clinical Genomics, Second Edition provides a full overview of next-generation sequencing (NGS) technologies that are currently used in clinical diagnostic laboratories. The book presents key bioinformatic challenges and solutions that must be addressed by clinical genomicists and genomic pathologists, such as specific pipelines for identification of the full range of variants that are clinically important. It focuses on the challenges of diagnostic interpretation of NGS results in a clinical setting, with later sections devoted to emerging regulatory issues governing the clinical use of NGS and reimbursement paradigms that will affect the way in which laboratory professionals get compensated for testing. Following the wide use of the current edition by clinicians and researchers alike, this fully revised, new edition addresses the evolving landscape of genomics medicine, along with recent advances in our understanding of molecular mechanisms of human diseases and developmental biology. In addition, the book updates on sequencing chemistry and platforms, bioinformatics algorithms, clinical informatics, IT infrastructure and emerging applications of artificial intelligence in genomics.
