Socialism - An Economic and Sociological Analysis Ludwig von Mises,2016-11-24 Socialism is the watchword and the catchword of our day. The socialist idea dominates the modern spirit. The masses approve of it. It expresses the thoughts and feelings of all; it has set its seal upon our time. When history comes to tell our story it will write above the chapter "The Epoch of Socialism." As yet, it is true, Socialism has not created a society which can be said to represent its ideal. But for more than a generation the policies of civilized nations have been directed towards nothing less than a gradual realization of Socialism.¹⁷ In recent years the movement has grown noticeably in vigour and tenacity. Some nations have sought to achieve Socialism, in its fullest sense, at a single stroke. Before our eyes Russian Bolshevism has already accomplished something which, whatever we believe to be its significance, must by the very magnitude of its design be regarded as one of the most remarkable achievements known to world history. Elsewhere no one has yet achieved so much. But with other peoples only the inner contradictions of Socialism itself and the fact that it cannot be completely realized have frustrated socialist triumph. They also have gone as far as they could under the given circumstances. Opposition in principle to Socialism there is none. Today no influential party would dare openly to advocate Private Property in the Means of Production. The word "Capitalism" expresses, for our age, the sum of all evil. Even the opponents of Socialism are dominated by socialist ideas. In seeking to combat Socialism from the standpoint of their special class interest these opponents—the parties which particularly call themselves "bourgeois" or "peasant"—admit indirectly the validity of all the essentials of socialist thought. For if it is only possible to argue against the socialist programme that it endangers the particular interests of one part of humanity, one has really affirmed Socialism. If one complains that the system of economic and social organization which is based on private property in the means of production does not sufficiently consider the interests of the community, that it serves only the purposes of single strata, and that it limits productivity; and if therefore one demands with the supporters of the various "social-political" and "social-reform" movements, state interference in all fields of economic life, then one has fundamentally accepted the principle of the socialist programme. Or again, if one can only argue against socialism that the imperfections of human nature make its realization impossible, or that it is inexpedient under existing economic conditions to proceed at once to socialization, then one merely confesses that one has capitulated to socialist ideas. The nationalist, too,

affirms socialism, and objects only to its Internationalism. He wishes to combine Socialism with the ideas of Imperialism and the struggle against foreign nations. He is a national, not an international socialist; but he, also, approves of the essential principles of Socialism.

The Social Revolution Karl Kautsky,1902

The Psychology of Marxian Socialism Henry de Man,2020-02-18 This classic work on the psychology of socialism carries for this edition a slightly refurbished title. By calling it The Psychology of Marxian Socialism, the work is sharply distinguished from an earlier work of the same title (written at a much earlier time) by Gustave LeBon. This book was written in the post-Bolshevik revolutionary era, at the height of the Weimar democracy in Germany; LeBon's represents a fin de siècle effort, reflecting earlier concerns in socialist theory. De Man's work derives its strength from a close and hard look at how socialism operated in one country. It is probably one of the greatest such efforts in the post-World War I period.

The Parallel Worlds of Classical Art and Text Jocelyn Penny Small,2008-08-04 Considering the relationship between artists and texts throughout classical antiquity, this study systematically applies new and objective criteria to judge the fidelity between picture and text. It becomes clear that artists illustrate stories, not texts, and Jocelyn Penny Small argues that artistic transmissions follow the model of oral, not textual, transmission where the variant rules and there is no original. Pictures on vases, she demonstrates, should not be used to reconstruct lost literary works.

Urnamma of Ur in Sumerian Literary Tradition Esther Flückiger-Hawker, 1999 This book presents new standard editions of all the hitherto known hymns of Urnamma, the founder of the Third Dynasty of Ur (fl. 2100 B.C.), and adds new perspectives to the composition and development of the genre of Sumerian royal hymns in general. The first chapter is introductory in nature. The second chapter presents a general survey of Urnamma's hymnic corpus. The third chapter deals with correlations of Urnamma's hymns with other textual sources pertaining to him. A fourth chapter is devoted to aspects of continuity and change in royal hymnography by analysing the Urnamma hymns in relation to other royal hymns and related genres. Chapter 5 presents editions of Urnamma hymns,

It promises to replace the mid-19th-century work of Pape and Benseler and offer fresh impetus to a wide range of historical and literary research. Produced under the auspices of the British Academy, the complete lexicon will be published in six volumes.
