**Doing Good Better** William MacAskill, 2015-07-28 Most of us want to make a difference. We donate our time and money to charities and causes we deem worthy, choose careers we consider meaningful, and patronize businesses and buy products we believe make the world a better place. Unfortunately, we often base these decisions on assumptions and emotions rather than facts. As a result, even our best intentions often lead to ineffective—and sometimes downright harmful—outcomes. How can we do better? While a researcher at Oxford, trying to figure out which career would allow him to have the greatest impact, William MacAskill confronted this problem head on. He discovered that much of the potential for change was being squandered by lack of information, bad data, and our own prejudice. As an antidote, he and his colleagues developed effective altruism, a practical, data-driven approach that allows each of us to make a tremendous difference regardless of our resources. Effective altruists believe that it's not enough to simply do good; we must do good better. At the core of this philosophy are five key questions that help guide our altruistic decisions: How many people benefit, and by how much? Is this the most effective thing I can do? Is this area neglected? What would have happened otherwise? What are the chances of success, and how good would success be? By applying these questions to real-life scenarios, MacAskill shows how many of our assumptions about doing good are misguided. For instance, he argues one can potentially save more lives by becoming a plastic surgeon rather than a heart surgeon; measuring overhead costs is an inaccurate gauge of a charity's effectiveness; and, it generally doesn't make sense for individuals to donate to disaster relief. MacAskill urges us to think differently, set aside biases, and use evidence and careful reasoning rather than act on impulse. When we do this—when we apply the head and the heart to each of our altruistic endeavors—we find that each of us has the power to do an astonishing amount of good.

**Dick Sands the Boy Captain** Jules Verne, 2023-07-15 For several years the command of the "Pilgrim" had been entrusted to Captain Hull, an experienced seaman, and one of the most dexterous harpooners in Weldon's service. The crew consisted of five sailors and an apprentice. This number, of course, was quite insufficient for the process of whale-fishing, which requires a large contingent both for manning the whale-boats and for cutting up the whales after they are captured; but Weldon, following the example of other owners, found it more economical to embark at San Francisco only just enough men to work the ship to New Zealand, where, from the promiscuous gathering of seamen of well-nigh every nationality, and

of needy emigrants, the captain had no difficulty in engaging as many whalemens as he wanted for the season. This method of hiring men who could be at once discharged when their services were no longer required had proved altogether to be the most profitable and convenient...FROM THE BOOKS.

**Market Design** Guillaume Haeringer, 2018-03-02 A broad overview of market mechanisms, with an emphasis on the interplay between theory and real-life applications; examples range from eBay auctions to school choice. This book offers an introduction to market design, providing students with a broad overview of issues related to the design and analysis of market mechanisms. It defines a market as a demand and a supply, without specifying a price system or mechanism. This allows the text to analyze a broad set of situations—including such unconventional markets as college admissions and organ donation—and forces readers to pay attention to details that might otherwise be overlooked. Students often complain that microeconomics is too abstract and disconnected from reality; the study of market design shows how theory can help solve existing, real-life problems. The book focuses on the interplay between theory and applications. To keep the text as accessible as possible, special effort has been made to minimize formal description of the models while emphasizing the intuitive, with detailed explanations and resolution of examples. Appendixes offer general reviews of elements of game theory and mechanism design that are related to the themes explored in the book, presenting the basic concepts with as many explanations and illustrations as possible. The book covers topics including the basics of simple auctions; eBay auctions; Vickrey-Clarke-Groves auctions; keyword auctions, with examples from Google and Facebook; spectrum auctions; financial markets, with discussions of treasury auctions and IPOs; trading on the stock market; the basic matching model; medical match; assignment problems; probabilistic assignments; school choice; course allocation, with examples from Harvard and Wharton; and kidney exchange.

Thirst Scott Harrison, 2018-10-02 NEW YORK TIMES BESTSELLER • An inspiring personal story of redemption, second chances, and the transformative power within us all, from the founder and CEO of the nonprofit charity: water. At 28 years old, Scott Harrison had it all. A top nightclub promoter in New York City, his life was an endless cycle of drugs, booze, models—repeat. But 10 years in, desperately unhappy and morally bankrupt, he asked himself, What would the exact opposite of my life look like? Walking away from everything, Harrison spent the next 16 months on a hospital ship in West Africa and discovered his true calling. In 2006, with no money and less than no experience, Harrison founded charity: water. Today, his organization has raised over \$750 million to bring clean drinking water to more than 17.4 million people around the globe. In *Thirst*, Harrison recounts the twists and turns that built charity: water into one of the most trusted and admired nonprofits in the world. Renowned for its 100% donation model, bold storytelling, imaginative branding, and radical commitment to transparency, charity: water has disrupted how social entrepreneurs work while inspiring millions of people to join its mission of bringing clean water to everyone on the planet within our lifetime. In the tradition of such bestselling

books as *Shoe Dog* and *Mountains Beyond Mountains*, *Thirst* is a riveting account of how to build a better charity, a better business, a better life—and a gritty tale that proves it's never too late to make a change. 100% of the author's net proceeds from *Thirst* will go to fund charity: water projects around the world.

**Isaac's Storm** Erik Larson,2011-10-19 NEW YORK TIMES BESTSELLER • The riveting true story of the Galveston hurricane of 1900, still the deadliest natural disaster in American history—from the acclaimed author of *The Devil in the White City* “A gripping account ... fascinating to its core, and all the more compelling for being true.” —The New York Times Book Review September 8, 1900, began innocently in the seaside town of Galveston, Texas. Even Isaac Cline, resident meteorologist for the U.S. Weather Bureau failed to grasp the true meaning of the strange deep-sea swells and peculiar winds that greeted the city that morning. Mere hours later, Galveston found itself submerged in a monster hurricane that completely destroyed the town and killed over six thousand people—and Isaac Cline found himself the victim of a devastating personal tragedy. Using Cline's own telegrams, letters, and reports, the testimony of scores of survivors, and our latest understanding of the science of hurricanes, Erik Larson builds a chronicle of one man's heroic struggle and fatal miscalculation in the face of a storm of unimaginable magnitude.

When Books Went to War Molly Guptill Manning,2014-12-02 This New York Times bestselling account of books parachuted to soldiers during WWII is a “cultural history that does much to explain modern America” (USA Today). When America entered World War II in 1941, we faced an enemy that had banned and burned 100 million books. Outraged librarians launched a campaign to send free books to American troops, gathering 20 million hardcover donations. Two years later, the War Department and the publishing industry stepped in with an extraordinary program: 120 million specially printed paperbacks designed for troops to carry in their pockets and rucksacks in every theater of war. These small, lightweight Armed Services Editions were beloved by the troops and are still fondly remembered today. Soldiers read them while waiting to land at Normandy, in hellish trenches in the midst of battles in the Pacific, in field hospitals, and on long bombing flights. This pioneering project not only lifted soldiers’ spirits, but also helped rescue *The Great Gatsby* from obscurity and made Betty Smith, author of *A Tree Grows in Brooklyn*, into a national icon. “A thoroughly engaging, enlightening, and often uplifting account . . . I was enthralled and moved.” — Tim O’Brien, author of *The Things They Carried* “Whether or not you’re a book lover, you’ll be moved.” — Entertainment Weekly

**The More of Less** Joshua Becker,2016-05-03 Don’t Settle for More Most of us know we own too much stuff. We feel the weight and burden of our clutter, and we tire of cleaning and managing and organizing. While excess consumption leads to

bigger houses, faster cars, fancier technology, and cluttered homes, it never brings happiness. Rather, it results in a desire for more. It redirects our greatest passions to things that can never fulfill. And it distracts us from the very life we wish we were living. Live a better life with less. In *The More of Less*, Joshua Becker helps you...

- Recognize the life-giving benefits of owning less
- Realize how all the stuff you own is keeping you from pursuing your dreams
- Craft a personal, practical approach to decluttering your home and life
- Experience the joys of generosity
- Learn why the best part of minimalism isn't a clean house, it's a full life

The beauty of minimalism isn't in what it takes away. It's in what it gives. *Make Room in Your Life for What You Really Want* "Maybe you don't need to own all this stuff." After a casual conversation with his neighbor on Memorial Day 2008, Joshua Becker realized he needed a change. He was spending far too much time organizing possessions, cleaning up messes, and looking for more to buy. So Joshua and his wife decided to remove the nonessential possessions from their home and life. Eventually, they sold, donated, or discarded over 60 percent of what they owned. In exchange, they found a life of more freedom, more contentment, more generosity, and more opportunity to pursue the things that mattered most. *The More of Less* delivers an empowering plan for living more by owning less. With practical suggestions and encouragement to personalize your own minimalist style, Joshua Becker shows you why minimizing possessions is the best way to maximize life. Are you ready for less cleaning, less anxiety, and less stress in your life? Simplicity isn't as complicated as you think.

A brilliant story of love and courage' *Wall Street Journal* When Silas Bird wakes in the dead of night, he watches powerlessly as three strangers take his father away.
