Empowerment and Poverty Reduction Deepa Narayan-Parker, 2002-01-01 This publication offers a framework for the empowerment of people living in poverty throughout the world that concentrates on increasing people's freedom of choice and action to shape their own lives. Based on analysis of practical experiences, the book identifies four key elements to support empowerment: information, inclusion and participation, improved accountability and local organisational capacity. This framework is then applied to five areas of action to improve development effectiveness: provision of basic services, improved local governance, improved national governance, pro-poor market development, and access to justice and legal aid. It also offers twenty 'tools and practices' which concentrate on a wide-range of topics to support the empowerment of the poor.

The Rebel Sell Joseph Heath, Andrew Potter, 2004 With the incredible popularity of Michael Moore's books and movies, and the continuing success of anti-consumer critiques like ADBUSTERS and Naomi Klein's NO LOGO, it is hard to ignore the growing tide of resistance to the corporate-dominated world. But do these vocal opponents of the status quo offer us a real political alternative? In this work of cultural criticism, Joseph Heath and Andrew Potter shatter the central myth of radical political, economic and cultural thinking. The idea of a counterculture, a world outside the consumer-dominated one that encompasses us, pervades everything from the anti-globalization movement to feminism and environmentalism. And the idea that mocking the system, or trying to 'jam' it so it will collapse, they argue, is not only counterproductive but has helped to create the very consumer society that radicals oppose. In a blend of pop culture, history and philosophical analysis, Heath and Potter offer a startling, clear picture of what a concern for social justice might look like without the confusion of the counterculture obsession with being different.--Book jacket.

Doing Business in 2006 World Bank, 2006 This publication is the third in a series of annual reports giving a comparative analysis of business regulations and their enforcement across 155 countries and over time. Comparable data indicators are

given for 10 topics: starting a business, dealing with licences, hiring and firing workers, registering property, getting credit, investment protection, paying taxes, trading across borders, enforcing contracts, and closing a business. These indicators are used to assess socio-economic outcomes including levels of unemployment and poverty, productivity, investment and corruption; and to identify which regulatory measures enhance business activity and those that work to constrain it. This is a co-publication of the World Bank and the International Finance Corporation.

Doing Business in 2005 ,2005 Doing Business in 2005: Obstacles to Growth is the second in a series of annual reports investigating the scope and manner of regulations that enhance business activity and those that constrain it. New quantitative indicators on business regulations and their enforcement can be compared across more than 130 countries, and over time. The indicators are used to analyze economic outcomes and identify what reforms have worked, where and why. Topics in Doing Business in 2005 include: Licensing and Inspections: Having registered a business, now what? In most countries, firms face a myriad of sector specific licenses as well as inspections to enforce compliance. The Doing Business database constructs two sets of indicators on the regulation of operations. One measures the steps, time and costs of complying with licensing and permit requirements for ongoing. The other assesses the enforcement of regulations through two of the most common types of inspections-labor and tax. Registering Property: Property registries were first developed to help raise tax revenue. What was good for the tax authorities has since proven to be good for strengthening property rights-the registries strengthen incentives to invest, facilitate trade, and expand access to credit. New indicators cover the steps, time and cost to register property. Measures of the legal provisions that strengthen property rights and the efficiency of property registries are also developed. Protecting Investors: Corporate governance issues are often thought to affect only publicly listed companies in developed countries. In fact, corporate governance is relevant for every large privately held company that has more than one owner. New indicators examine several possible types of shareholder expropriation, including related-party transactions, guarantees and loans to company managers and directors, mergers and acquisitions, disclosure of ownership information, and treatment of conflicts of interest. Including a new emphasis on gender, Doing Business not only provides insights into business constraints throughout the world but highlights particular barriers faced by women. Doing Business is a comprehensive resource that no investor, economic adviser, business developer, or economic policymaker should be without.

The Medicare Handbook ,

Insurgency and Counterinsurgency in the 21st Century Steven Metz,2004 Modern insurgency warfare presents fresh

challenges for the United States, which must re-conceptualize its approach to fighting such conflicts. Because the dominant characteristics of insurgency--protractedness and ambiguity--effectively stymie the American military's approach to war, the United States needs to reorient its strategic thinking. The key to success is not for the U.S. military to become better at counterinsurgency, but for the U.S. military (and other elements of the government) to be skilled at helping local security and intelligence forces become effective at it. Adapting tactics and strategies to the realities on the ground is not only pragmatic, but also crucial to success.

Law and Religion in Europe Norman Doe, 2011-08-04 Each state in Europe has its own national laws which affect religion and these are increasingly the subject of political and academic debate. This book provides a detailed comparative introduction to these laws with particular reference to the states of the European Union. A comparison of national laws on religion reveals profound similarities between them. From these emerge principles of law on religion common to the states of Europe and the book articulates these for the first time. It examines the constitutional postures of states towards religion, religious freedom, and discrimination, and the legal position, autonomy, and ministers of religious organizations. It also examines the protection of doctrine and worship, the property and finances of religion, religion, education, and public institutions, and religion, marriage, and children, as well as the fundamentals of the emergent European Union law on religion. The existence of these principles challenges the standard view in modern scholarship that there is little commonality in the legal postures of European states towards religion - it reveals that the dominant juridical model in Europe is that of cooperation between State and religion. The book also analyses national laws in the context of international laws on religion, particularly the European Convention on Human Rights. It proposes that national laws go further than these in their treatment and protection of religion, and that the principles of religion law common to the states of Europe may themselves represent a blueprint for the development of international norms in this field. The book provides a wealth of legal materials for scholars and students. The principles articulated in it also enable greater dialogue between law and disciplines beyond law, such as the sociology of religion, about the role of religion in Europe today. The book also identifies areas for further research in this regard, pointing the direction for future study.

Terrorism and the Electric Power Delivery System National Research Council, Division on Engineering and Physical Sciences, Board on Energy and Environmental Systems, Committee on Enhancing the Robustness and Resilience of Future Electrical Transmission and Distribution in the United States to Terrorist Attack, 2012-11-25 The electric power delivery system that carries electricity from large central generators to customers could be severely damaged by a small number of well-informed attackers. The system is inherently vulnerable because transmission lines may span hundreds of miles, and many key facilities are unguarded. This vulnerability is exacerbated by the fact that the power grid, most of which was originally designed to meet the needs of individual vertically integrated utilities, is being used to move power between

regions to support the needs of competitive markets for power generation. Primarily because of ambiguities introduced as a result of recent restricting the of the industry and cost pressures from consumers and regulators, investment to strengthen and upgrade the grid has lagged, with the result that many parts of the bulk high-voltage system are heavily stressed. Electric systems are not designed to withstand or quickly recover from damage inflicted simultaneously on multiple components. Such an attack could be carried out by knowledgeable attackers with little risk of detection or interdiction. Further well-planned and coordinated attacks by terrorists could leave the electric power system in a large region of the country at least partially disabled for a very long time. Although there are many examples of terrorist and military attacks on power systems elsewhere in the world, at the time of this study international terrorists have shown limited interest in attacking the U.S. power grid. However, that should not be a basis for complacency. Because all parts of the economy, as well as human health and welfare, depend on electricity, the results could be devastating. Terrorism and the Electric Power Delivery System focuses on measures that could make the power delivery system less vulnerable to attacks, restore power faster after an attack, and make critical services less vulnerable while the delivery of conventional electric power has been disrupted.
