

Principles Of Person Centred Practice

Ellen Nolte,Sherry Merkur,Anders Anell

Fundamentals of Person-Centred Healthcare Practice Brendan McCormack,Tanya McCance,Cathy Bulley,Donna Brown,Ailsa McMillan,Suzanne Martin,2020-12-29 *Fundamentals of Person-Centred Healthcare Practice* presents evidence-based perspectives on a broad range of approaches to person-centred practice in healthcare. Featuring contributions from internationally recognised experts in the field, this valuable textbook helps students and staff across healthcare disciplines understand the essential concepts of person-centred practice in various health-related contexts. Using the Person-centred Practice Framework—an innovative theoretical model based on more than two decades of research and practice—students develop a strong understanding of the different components of person-centredness, their connections and interactions, and how they can be implemented to promote positive healthcare experiences for care providers, service-users, and families. Recognising the dynamic and complex nature of person-centredness, the text emphasises the importance of a common language and a shared understanding of person-centred practice in all areas of healthcare, from hospital and social care systems, to mental health, learning disability, and rehabilitation services. This practical and insightful introduction to the subject: Provides engaging, student-friendly coverage of the central principles and practice of person-centredness within a multi-professional and interdisciplinary context Features cases and examples of person-centred practice in curricula worldwide Includes activities designed to support person-centred practitioner development Discusses the future of person-centred facilitation, learning and practice Offers real-world guidance on providing a holistic approach to developing person-centred relationships that facilitate meaningful connections with others *Fundamentals of Person-Centred Healthcare Practice* is an indispensable resource for nursing and allied health professionals, and an important reference work for educators, facilitators, supervisors and healthcare practitioners.

Through the Patient's Eyes Margaret Gerteis,Susan Edgman-Levitan,Jennifer Daley,Thomas L. Delbanco,2002-05-03 Sponsored by the Picker/Commonwealth Program for Patient-Centered Care In this comprehensive, research-based look at the experiences and needs of patients, the authors explore models of care that can make hospitalization more humane. *Through the Patient's Eyes* provides insights into why some hospitals are more patient-centered than others; how physicians can become more involved in patient-centered quality efforts; and how patient-centered quality can be integrated into health care policy, standards, and regulations. The authors show how, by bringing the patient's perspective to the design and

delivery of health services, providers can improve their ability to meet patient's needs and enhance the quality of care.

Intelligent Systems for Sustainable Person-Centered Healthcare Dalia Kriksciuniene, Virgilijus Sakalauskas, 2022-02-17

This open access book establishes a dialog among the medical and intelligent system domains for igniting transition toward a sustainable and cost-effective healthcare. The Person-Centered Care (PCC) positions a person in the center of a healthcare system, instead of defining a patient as a set of diagnoses and treatment episodes. The PCC-based conceptual background triggers enhanced application of Artificial Intelligence, as it dissolves the limits of processing traditional medical data records, clinical tests and surveys. Enhanced knowledge for diagnosing, treatment and rehabilitation is captured and utilized by inclusion of data sources characterizing personal lifestyle, and health literacy, and it involves insights derived from smart ambience and wearables data, community networks, and the caregivers' feedback. The book discusses intelligent systems and their applications for healthcare data analysis, decision making and process design tasks. The measurement systems and efficiency evaluation models analyze ability of intelligent healthcare system to monitor person health and improving quality of life.

Patient-Centered Medicine Moira Stewart, Judith Belle Brown, Wayne Weston, Ian R. McWhinney, Carol L.

McWilliam, Thomas Freeman, 2013-12-28 This long awaited Third Edition fully illuminates the patient-centered model of medicine, continuing to provide the foundation for the Patient-Centered Care series. It redefines the principles underpinning the patient-centered method using four major components - clarifying its evolution and consequent development - to bring the reader fully up-to-

Practice Development in Nursing and Healthcare Brendan McCormack,Kim Manley,Angie Titchen,2013-01-08 In its first edition, Practice Development in Nursing made an important contribution to understanding practice development and its core components. Now fully updated to take into account the many developments in the field, the second edition continues to fill an important gap in the market for an accessible, practical text on what remains a key issue for all members of the healthcare team globally. Practice Development in Nursing and Healthcare explores the basis of practice development and its aims, implementation and impact on healthcare, to enable readers to be confident in their approaches to practice development. It is aimed at healthcare professionals in a variety of roles (for example clinical practice, education, research and quality improvement) and students, as well as those with a primary practice development role, in order to enable them to

effectively and knowledgeably develop practice and the practice of others. Key features: New updated edition of a seminal text in the field, including significant new material
Relevance to the entire healthcare team
Accessible and practical in style, with case studies, scenarios and examples throughout
Edited by and with contributions from experts in the field
Fully updated to include the latest research
Supported by a strong evidence base

Person-Centred Therapy Paul Wilkins, 2015-12-14
Person-centred therapy, rooted in the experience and ideas of the eminent psychotherapist Carl Rogers, is widely practised in the UK and throughout the world. It has applications in health and social care, the voluntary sector and is relevant to work with people who are severely mentally and emotionally distressed. As well as being a valuable sourcebook and offering a comprehensive overview, this edition includes updated references and a new section on recent developments and advances. The book begins with a consideration of the principles and philosophy underpinning person-centred therapy before moving to a comprehensive discussion of the classical theory upon which practice is based. Further areas of discussion include: The model of the person, including the origins of mental and emotional distress The process of constructive change A review of revisions of and additions to person-centred theory Child development, styles of processing and configurations of self The quality of presence and working at relational depth Criticisms of the approach are addressed and rebutted and the application of theory to practice is discussed. The new final section is concerned with advances and developments in theory and practice including: Counselling for Depression The Social Dimension to Person-Centred Therapy Person-Centred Practice with People experiencing Severe and Enduring Distress and at the 'Difficult Edge' A Review of Research Throughout the book, attention is drawn to the wider person-centred literature to which it is a valuable key. Person-Centred Therapy will be of particular use to students, scholars and practitioners of person-centred therapy as well as to anyone who wants to know more about one of the major

psychotherapeutic modalities.

Person-Centred Therapy Paul Wilkins, 2009-09-14 Person-centred therapy, based on the ideas of the eminent psychotherapist Carl Rogers, is widely practised in the UK and throughout the world. It has applications in health and social care, the voluntary sector and is increasingly relevant to work with people who are severely mentally and emotionally distressed. This book offers a comprehensive overview and presents the core theories, advances and practices of the approach in a concise, accessible form. *Person-Centred Therapy: 100 Key Points* begins with a consideration of the principles and philosophy underpinning person-centred therapy before moving to a comprehensive discussion of the classic theory upon which practice is based. Further areas of discussion include: the model of the person, including the origins of mental and emotional distress the process of constructive change a review of revisions and advances in person-centred theory child development, styles of processing and configurations of self the quality of presence and working at relational depth. Finally criticisms of the approach are addressed and rebutted, leading readers to the wider person-centred literature. As such this book will be particularly useful to students and scholars of person-centred therapy, as well as anyone who wants to know more about one of the major therapeutic modalities.

Person-centred Nursing Research: Methodology, Methods and Outcomes Jan Dewing, Brendan McCormack, Tanya McCance, 2021-04-26 This book is the first ever to offer a contemporary collection of different perspectives on person-centredness in international doctoral nursing research. The research in the book is based on the ideas and values of personhood and person-centeredness, which have been used and can be seen to guide research approaches, inform research designs and theorize research findings. Further, a specific framework for person-centred nursing is embedded throughout the research studies presented in the text. The Person-centred Nursing Framework (PCNF) developed by Brendan McCormack and Tanya McCance in 2010, is recognized as a nursing theory and this book further develops it as a basis for research and for advancing person-centredness in nursing. The framework informs all stages of the research process, from design through to dissemination. The book is structured into a number of highly engaging chapters written by doctoral candidates, and recently graduated candidates. The opening and closing chapters, written by the editors, place the subsequent chapters in a global context of person-centredness and nursing. The potential for person-centred nursing research to be a global movement is recognized and debated. The subsequent chapters lead readers through philosophical ideas, methodologies and methods whilst also offering reflective and honest insights into learning how to become a person-centred researcher. This field is growing and developing but yet there is no specific book available. As a result, researchers spend considerable time and effort translating existing research methodologies into person-centred perspectives. This book fills this gap and acts as a key resource for future nurse researchers. The text is intended for, and benefits nursing doctoral candidates, masters candidates and academic staff who teach and supervise research candidates; it may also appeal to other

graduate learners. The book has international contributions which makes it appealing internationally./div

Achieving Person-Centred Health Systems Ellen Nolte, Sherry Merkur, Anders Anell, 2020-08-06 An evidence-based analysis of the opportunities and challenges of moving towards more person-centred health systems.

Delivering Better Services for People with Long-term Conditions Angela Coulter, Sue Roberts, Anna Dixon, 2013 This paper describes a co-ordinated service delivery model - the 'house of care' - that aims to deliver proactive, holistic and patient-centred care for people with long-term conditions. It includes learning from a number of sites in England that are working to achieve these goals, and makes recommendations on how key stakeholders can work together to improve care for people with long-term conditions.

Person-Centred Counselling in a Nutshell Roger Casemore, 2011-03-04 Person-Centred Counselling in a Nutshell is a short, accessible guide to one of the most popular approaches to counselling. Using examples drawn from practice, Roger Casemore outlines, in a clear, jargon-free style, the main principles of the person-centred approach, using the core therapeutic conditions: - congruence - unconditional regard - empathy This revised and updated second edition includes new material on professional issues, on the use of person-centred counselling in short-term therapy, and on the wider application of the person-centred approach in other settings. Providing a concise introduction to the theory and practice of person-centred counselling, Person-Centred Counselling in a Nutshell is the ideal place to start for anyone reading about the approach for the first time. Roger Casemore is Senior Teaching Fellow and Director of Counselling courses at University of Warwick

Interprofessional Rehabilitation Sarah G. Dean, Richard J. Siegert, William J. Taylor, 2012-10-01 Interprofessional Rehabilitation: a Person-Centred Approach is a concise and readable introduction to the principles and practice of a person-centred interprofessional approach to rehabilitation, based upon a firm scientific evidence base. Written by a multi-contributor team of specialists in physiotherapy, occupational therapy, nursing, psychology and rehabilitation medicine, this text draws together common themes that cut across the different professional groups and the spectrum of health conditions requiring rehabilitation, and sets out a model of practice that is tailored to the specific needs of the client. Showing interprofessionalism at work in a range of clinical contexts, the book argues that effective rehabilitation is best conducted by well-integrated teams of specialists working in an interdisciplinary way, with the client or patient actively involved in all stages of the process. This book will be essential reading for students preparing for practice in an increasingly interprofessional environment, and will be of interest to any health care practitioner keen to understand how an integrated approach to rehabilitation can benefit their clients.

Client-centered Therapy Carl R. Rogers, 2003-07 Presenting the non-directive and related points of view in counselling and therapy, Rogers gives a clear exposition of procedures by which individuals who are being counselled may be assisted in

achieving for themselves new and more effective personality adjustments.

The Practice of Person-Centred Couple and Family Therapy Charles O'Leary, 2011-11-29 In *The Practice of Person Centred Couple and Family Therapy*, Charles O'Leary offers a rich description of relationship therapy that draws on the resources of both person-centred psychotherapy and systemic and family therapy to present a skilful, respectful and empathic approach to working with couples and families. Grounded in detailed descriptions of client goals and predicaments, the book takes an inside look at the therapist's options and decision-making with both clarity and compassion. Written in a refreshing, lively and personal style, the book: - Provides an abundance of ideas and techniques relevant to each step of the therapeutic process. - Addresses the complexity of family and couple therapy, including chapters on working with same-sex couples and working with children and adolescents. - Offers humanistic depth and breadth to a challenging area of practice, with a strong value base and a philosophy that always privileges the client's viewpoint. Clear, concise, and highly readable, this is a vital, thought-provoking text for students, trainees and practitioners of counselling and psychotherapy working with couples and families.

Rethinking Causality, Complexity and Evidence for the Unique Patient Rani Lill Anjum, Samantha Copeland, Elena Rocca, 2020-06-02 This open access book is a unique resource for health professionals who are interested in understanding the philosophical foundations of their daily practice. It provides tools for untangling the motivations and rationality behind the way medicine and healthcare is studied, evaluated and practiced. In particular, it illustrates the impact that thinking about causation, complexity and evidence has on the clinical encounter. The book shows how medicine is grounded in philosophical assumptions that could at least be challenged. By engaging with ideas that have shaped the medical profession, clinicians are empowered to actively take part in setting the premises for their own practice and knowledge development. Written in an engaging and accessible style, with contributions from experienced clinicians, this book presents a new philosophical framework that takes causal complexity, individual variation and medical uniqueness as default expectations for health and illness.
