Falls in Older People Stephen R. Lord, Catherine Sherrington, Hylton B. Menz, Jacqueline C. T. Close, 2007-03-01 Since the first edition of this very successful book was written to synthesise and review the enormous body of work covering falls in older people, there has been an even greater wealth of informative and promising studies designed to increase our understanding of risk factors and prevention strategies. This second edition, first published in 2007, is written in three parts: epidemiology, strategies for prevention, and future research directions. New material includes recent studies covering: balance studies using tripping, slipping and stepping paradigms; sensitivity and depth perception visual risk factors; neurophysiological research on automatic or reflex balance activities; and the roles of syncope, vitamin D, cataract surgery, health and safety education, and exercise programs. This edition will be an invaluable update for clinicians, physiotherapists, occupational therapists, nurses, researchers, and all those working in community, hospital and residential or rehabilitation aged care settings.

An Occupational Therapist's Guide to Home Modification Practice Elizabeth Ainsworth, Desleigh de Jonge, 2024-06-01 Older people and people with a disability have a right to be included in all aspects of home and community life, and yet, environmental barriers continue to exist in the built environment. There are concerns about how well homes can support older people and people with a disability over time as their needs change. Occupational therapists are well suited to determining the most appropriate home modification solutions to address environmental barriers. They possess the knowledge and skills necessary to evaluate people's current and future needs in the context of the nature and use of the environment and can work collaboratively with design and construction professionals to develop solutions. To be comprehensive and effective in their approach, occupational therapists need to understand not only the individual's requirements, but also, the ethical and legal contexts for practice, the technical aspects of the built environment, the relevance and intent of access standards and design approaches, and the application of a range of products and finishes. An Occupational Therapist's Guide to Home Modification Practice, Second Edition by Elizabeth Ainsworth and Desleigh de Jonge and their team of expert contributors provides comprehensive information to inform occupational therapists about current practice and research. This includes the authors using a transactional approach to examine the person-occupation-

environment interaction and providing occupational therapists with a detailed understanding of the various dimensions of the home environment that can impact on client's home modification decisions. New material has been provided relating to research and practice issues, such as an overview of the latest home modification outcome research findings as documented in literature; an update on outcome evaluation; new research information about the dimensions of the home impacting on decision making; additional information grabrail and ramp prescription; and the inclusion of new case studies illustrating minor and major modification solutions for clients who present with diverse needs. In the Second Edition you'll find: A detailed understanding of aspects of the home environment that impact home modification decisions A review of legislative environment and funding systems that facilitate service delivery An overview of home modification services, as well as future trends A range of comprehensive case studies — illustrated by photographs Additional theory to inform knowledge, and skill development, that can be used in home modification practice worldwide Included with the text are online supplemental materials for faculty use in the classroom.. An Occupational Therapist's Guide to Home Modification Practice, Second Edition provides a range of resources and tools, and it can be used as a teaching aid to support students, interns, and novice therapists or as a manual for reflection and practice for more experienced home modification practitioners.

Principles of Assessment and Outcome Measurement for Occupational Therapists and Physiotherapists Alison Laver Fawcett, 2013-03-15 This textbook on assessment and outcome measurement is written for both occupational therapy and physiotherapy students and qualified therapists. It begins by defining what is meant by assessment, outcome, evaluation and measurement and discussing the complexity of therapy assessment and measurement, including the challenge of measuring human behaviour and the impact of factors such as task demand and context, including the environment. Methods of data collection (e.g. observation, interview, standardised testing) and sources (e.g. self-report, proxy) for collecting information about clients are then reviewed, and the main purposes of assessment (e.g. descriptive, evaluative, predictive, discriminative) presented. The book then addresses the topics of standardisation, levels of measurement, reliability, validity and clinical utility. There is a chapter describing and applying models for categorizing levels of function to aid assessment and measurement. The concept of clinical reasoning and reflective practice is then explored. Application of principles is supported through detailed case studies and worksheets and the criteria for test critique and guidelines for choosing a particular assessment approach are discussed.

Measuring Occupational Performance Mary Law, Carolyn M. Baum, Winnie Dunn, 2024-06-01 As the profession of occupational therapy continues to mature and expand its practice, the measurement of occupational performance is one of the key avenues that all practicing clinicians will need to explore and master. *Measuring Occupational Performance: Supporting Best Practice in Occupational Therapy*, Third Edition summarizes the measurement tools needed to assess client occupational performance, to provide the best intervention, and to document the effectiveness of that intervention. These

measurement tools are not just a compilation of all that are available for measurement relevant to occupational therapy; they are an elite group of tools carefully selected by the editors through a process of rigorous theoretical, clinical, and scientific reasoning. In this Third Edition, Drs. Mary Law, Carolyn Baum, and Winnie Dunn have updated current chapters and added new topics that have not been covered in past editions, such as a chapter on measuring school performance, a key area of practice. Also included is a chapter on measurement principles and development to highlight the concepts common to all the measures included in the text. The Third Edition also has a focus on the best measures and measures that are used most frequently. Features of the Third Edition: Offers insight into the importance of measuring functional performance, methodologies, measurement issues, and best approach for outcome measurement Conveys a broad focus on occupational performance and offers examples from a wide range of practice settings and from multiple spots throughout the lifespan Explains the technical aspects of measurement development and methodologies and which components of functioning are to be measured and how Develops an understanding of the theoretical aspects and evidence for both standardized tests and non-standardized tests Instructors in educational settings can visit www.efacultyounge.com for additional material to be used for teaching in the classroom. New in the Third Edition: Focus on strengths-based approaches Measures health and disability at both individual and population levels using the International Classification of Functioning, Disability and Health (ICF) An emphasis on evidence-based practice and using evidence from other disciplines, not just from occupational therapy New chapter focused on school-based practice New content on reliability, validity, and responsiveness New content on goal attainment Additional material on decision making in practice In this changing health care environment, *Measuring Occupational Performance: Supporting Best Practice in Occupational Therapy, Third Edition* explains how core values and beliefs can be put into everyday practice and is the essential reference manual for the evidence-based occupational therapy and occupational therapy assistant student and practitioner.

Handbook of Occupational Therapy for Adults with Physical Disabilities William Sit, Marsha Neville, 2024-06-01
Handbook of Occupational Therapy for Adults With Physical Disabilities by Drs. William Sit and Marsha Neville provides quick and essential information for occupational therapists that are new to the adult practice setting. This handbook is primarily organized by body system into six sections: Occupational performance as a whole Central nervous system Peripheral nervous system, cranial nerves, and sensory system Musculoskeletal system Cardiovascular, lymphatic, respiratory, and integumentary systems Endocrine, digestive, urinary, and reproductive system At the beginning of each section, you will find a case study based on clinical experience that embodies the chapter subject. Within each section information is broken down into important aspects of the evaluation process, and then followed by the implications of each system on occupational therapy intervention. *Handbook of Occupational Therapy for Adults With Physical Disabilities* also includes a summary chart where readers can quickly and easily find the purpose, context, form, cost, and contact information

for each assessment. Handbook of Occupational Therapy for Adults With Physical Disabilities is ideal for occupational therapy students, recent graduates, and practitioners who are newly entering an adult physical disability practice setting.

Handbook of Assessment in Clinical Gerontology Peter A. Lichtenberg, 2010-08-20 New trends in mental healthcare practice and a rapid increase in the aged population are causing an explosion in the fields of clinical gerontology and geropsychology today. This comprehensive second edition handbook offers clinicians and graduate students clear guidelines and reliable tools for assessing general mental health, cognitive functioning, functional age, psychosocial health, comorbidity, behavior deficits, and more. Psychopathology, behavioral disorders, changes in cognition, and changes in everyday functioning are addressed in full, and a wide range of conditions and disorders common to this patient population are covered. Each chapter provides an empirical review of assessment instruments, assessment scales in their totality, a review of how these instruments are used with and adapted for different cultural groups, illustration of assessments through case studies, and information on how to utilize ongoing assessment in treatment and/or treatment planning. This combination of elements will make the volume the definitive assessment source for clinicians working with elderly patients. - The most comprehensive source of up-to-date data on gerontological assessment, with review articles covering: psychopathology, behavioral disorders, changes in cognition, and changes in everyday functioning - Consolidates broadly distributed literature into single source, saving researchers and clinicians time in obtaining and translating information and improving the level of further research and care they can provide - Chapters directly address the range of conditions and disorders most common for this patient population - i.e. driving ability, mental competency, sleep, nutrition, sexual functioning, demntias, elder abuse, depression, anxiety disorders, etc - Fully informs readers regarding conditions most commonly encountered in real world treatment of an elderly patient population - Each chapter cites case studies to illustrate assessment techniques - Exposes reader to real-world application of each assessment discussed

Occupational Therapy for People Experiencing Illness, Injury or Impairment - E-Book Michael Curtin, Mary Egan, Yeliz Prior, Tracey Parnell, Roshan Galvaan, Katrine Sauvé-Schenk, Daniel Cezar Da Cruz, 2024-09-17 Occupational Therapy for People Experiencing Illness, Injury or Impairment is a seminal textbook that has been used in preregistration occupational therapy education for more than 40 years. Now in its eighth edition, it reflects significant developments within the occupational profession and the contexts of the delivery of health and social care when working with people who experience illness, injury or impairment to promote occupational participation. It is highly regarded for its level of detail, its practical approach, and the breadth of its content, with input from multiple authors from around the world. Fully updated and built around the professional concepts and processes to promote occupational participation this invaluable resource will enable occupational therapists link theory with day-to-day practice, reflect on the knowledge, expertise and attitudes that inform their work and practice in a critically reflexive way. - Practical text and online assets link theory with day-to-day

practice - Collaborative-relationship-focused, inclusive and strengths-based language - Summaries and key points for each chapter make navigation easy - Focus on working with groups, communities and populations in addition to working with individuals, reflecting the evolving and expanding scope of practice - Practice stories throughout the text, and detailed practice stories in Section 5, inviting the reader to reflect on the information, skills and attitudes that inform practice - Online multiple choice questions and questions for reflection at the end of each chapter enable readers to assess and apply their knowledge

Physiotherapy and Occupational Therapy for People with Cerebral Palsy Karen Dodd,Christine Imms,Nicholas F. Taylor,2010-03-08 This book is a practical resource for physiotherapists and occupational therapists who support people with cerebral palsy, helping them to solve the problems with movement and other impairments that so often accompany cerebral palsy, so that they can be more active and better able to participate in roles such as study, work, recreation and relationships. The first chapters provide the background to the clinical reasoning approach that informs the whole text, as well as an overview of therapeutic interventions. The subsequent chapters present clinical situations that therapists will encounter in the course of their work with individuals with cerebral palsy across the lifespan. Each chapter describes a case in detail, including the reasoning behind assessment and treatment choices, interventions and outcomes. The themes emphasized throughout the book are the use of the clinical reasoning approach of the intervention process model, the International Classification of Functioning, Disability and Health as a framework to help therapists inform patient and family decision-making, family-centred approaches in developing and implementing therapeutic strategies, and multidisciplinary team work.

Legal Aspects of Occupational Therapy Bridgit C. Dimond,2011-08-02 Since publication of the original edition in 1996, this book has established itself as an essential text for occupational therapists. It offers an understanding of the law relating to their practice, but is written to be accessible for those who have no prior legal knowledge. The text provides valuable information for occupational therapists employed in health and social services, as well as the law relevant to private practitioners. The book includes chapters on all the main client groups and presents the relevant specialist law. Students and teachers of occupational therapy will find the chapters on professional registration, education, training and research of particular interest. The third edition has been substantially revised to cover significant changes in legislation since the previous version. There is also a brand new chapter on the subject of death and dying. Legal Aspects of Occupational Therapy remains a key resource for the occupational therapy student, practitioner and service manager.

Stepping On: Building Confidence and Reducing Falls 3rd edn Lindy Clemson, Megan Swann, 2019-11-01 The Stepping On program is a community-based falls-prevention program that shows participants how to reduce falls, increase confidence and maintain personal independence. Originally developed in Australia, based on research and scientifically proven to work, the Stepping On program is now internationally recognised as best practice in falls prevention. The Stepping On manual is aimed at health workers with a passion for aged care. It offers a step-by-step guide to running the seven-week group program, plus essential background information. Topics covered include understanding the risk of falls, identifying home hazards, the role of vision in causing and preventing falls, staying safe in public places, strength and balance exercises, and much more. The manual includes a guide to useful resources, handouts for group participants, and suggestions for recruitment and evaluation. This new edition has been thoroughly revised and redesigned to incorporate cutting-edge research, professional feedback, and over fifteen years' experience of running of the program. As well as the latest fall-prevention research, the revised manual contains an expanded section on working with culturally and linguistically diverse groups, simplified exercises for participants to do at home, and new stories and illustrations. 'This is an invaluable manual incorporating the latest evidence for falls prevention in the community.' Professor Lyn March AM, University of Sydney and Royal North Shore Hospital, Sydney 'This new Stepping On manual will be a wonderful resource for many health professionals like myself who work with patients who have had falls and fractures. It is definitely my "go-to" resource in our very busy clinic!' Lillias Nairn, North Shore Ryde Health Service A range of handouts and supplementary materials are available for download. Please click on the Table of Contents tab for links to download the supplementary materials.

Practical General Practice Alex Khot, Andrew Polmear, 2011-11-18 Practical General Practice is a highly practical manual, specifically designed for use during the consultation process. Containing over 1000 conditions, the unique underlying structure of the book allows the GP to see immediately what treatment is recommended and why. All recommendations are highly specific - giving a firm guide to the GP during the consultation process rather than a list of possibilities that the GP might wish to consider. Bullet points for action which give the GP an immediate summary of the issues that must be covered in the consultation. Bullet points of the key evidence which justifies those recommendations. All chapters thoroughly revised, to reflect changes in the evidence, and in major guidelines, since the last edition. NNT values provided when available

Occupational Therapy and Older People Anita Atwal, Ann McIntyre, 2013-02-12 This book locates older people as major clients of occupational therapy services. It provides a comprehensive resource for students and a basic working reference for clinicians. The book encompasses current theories, debates and challenges which occupational therapists need to engage in if they are to provide pro-active and promotional approaches to ageing. Detailed coverage of bodily structures, functions and pathologies leads onto chapters dedicated to activity, occupation and participation. The ethos of the book is to inspire innovation in the practice of occupational therapy with older people, promoting successful ageing that entails control and empowerment. This new edition has been fully revised and updated. In addition brand new material has been included on occupational transitions (retirement, frailty and end of life); user perspectives; public health including advocacy, enablement and empowerment; people entering old age with disability and mental health conditions; visual impairment; assistive technology driving and ageism.

Assistive Technology C. Sik-Lányi, E.-J. Hoogerwerf, K. Miesenberger, 2015-08-27 Assistive Technology (AT) is the term used to describe products or technology-based services which support those with disabilities or other limitations to their daily activities, enabling them to enjoy a better quality of life. This book presents the proceedings of the 13th European Conference on the Advancement of Assistive Technology (AAATE 2015), held in Budapest, Hungary in September 2015. This biennial conference has established itself as a leading forum in the transdisciplinary area of Assistive Technology, providing a unique platform for the gathering of experts from around the world to review progress and challenges in the interdisciplinary fields which contribute to AT, such as research, development, manufacturing, supply, provision and policy. The theme of the 2015 conference is 'Attracting new areas and building bridges', and this book contains 138 reviewed papers and 28 poster presentations delivered at the conference, covering AT themes as diverse as aging, blindness, mobility, assisted living and accessibility for people with dementia and cognitive impairment. Offering a current overview of many aspects of AT, this book will be of interest to all those - from researchers and manufacturers to healthcare professionals and end-users - whose work or daily life involves the relationship between technology and disability.

The Occupational Therapy Handbook: Practice Education Tracey Polglase, Rachel Treseder, 2012 Written specifically for occupational therapy students, newly qualified occupational therapists and educators and is a useful reference guide for academic tutors. The Occupational Therapy Handbook reflects modern day occupational therapy practice and education. The editors have created a current user-friendly text book specifically in relation to Practice Education, particularly in light of the developing role of occupational therapy in current practice. Many developments in practice education have re-focussed the value that the profession places on occupation, particularly in role emerging placements and expanding areas of practice. These developments are captured in this text. Other texts that have been produced have predominantly had a multi-professional focus and not addressed all the key occupational therapy issues in the depth required. There is always something to learn, irrespective of your level of expertise.
