Ecology Charles J. Krebs, 2001 This best-selling majors ecology book continues to present ecology as a series of problems for readers to critically analyze. No other text presents analytical, quantitative, and statistical ecological information in an equally accessible style. Reflecting the way ecologists actually practice, the book emphasizes the role of experiments in testing ecological ideas and discusses many contemporary and controversial problems related to distribution and abundance. Throughout the book, Krebs thoroughly explains the application of mathematical concepts in ecology while reinforcing these concepts with research references, examples, and interesting end-of-chapter review questions. Thoroughly updated with new examples and references, the book now features a new full-color design and is accompanied by an art CD-ROM for instructors. The field package also includes The Ecology Action Guide, a guide that encourages readers to be environmentally responsible citizens, and a subscription to The Ecology Place (www.ecologyplace.com), a web site and CD-ROM that enables users to become virtual field ecologists by performing experiments such as estimating the number of mice on an imaginary island or restoring prairie land in Iowa. For college instructors and students.

Never Cry Wolf Farley Mowat, 2009-01-13 EYE TO EYE WITH DEATH: THE WOLF PROJECT Hordes of bloodthirsty wolves are slaughtering the arctic caribou, and the government's Wildlife Service assigns naturalist Farley Mowat to investigate. Mowat is dropped alone onto the frozen tundra, where he begins his mission to live among the howling wolf packs and study their ways. Contact with his quarry comes quickly, and Mowat discovers not a den of marauding killers but a courageous family of skillful providers and devoted protectors of their young. As Mowat comes closer to the wolf world, he comes to fear with them the onslaught of bounty hunters and government exterminators out to erase the noble wolf community from the Arctic. Never Cry Wolf is one of the brilliant narratives on the myth and magic of wild wolves and man's true place among the creatures of nature. We have doomed the wolf not for what it is, but for what we deliberately and mistakenly perceive it to be — the mythologized epitome of a savage, ruthless killer — which is, in reality, no more than the reflected image of ourself. — From the new Preface

Less is More Jason Hickel, 2020-08-13 'A powerfully disruptive book for disrupted times ... If you're looking for

transformative ideas, this book is for you.' KATE RAWORTH, economist and author of Doughnut Economics A Financial Times Book of the Year _____ Our planet is in trouble. But how can we reverse the current crisis and create a sustainable future? The answer is: DEGROWTH. Less is More is the wake-up call we need. By shining a light on ecological breakdown and the system that's causing it, Hickel shows how we can bring our economy back into balance with the living world and build a thriving society for all. This is our chance to change course, but we must act now.

_____ 'A masterpiece... Less is More covers centuries and continents, spans academic disciplines, and connects contemporary and ancient events in a way which cannot be put down until it's finished.' DANNY DORLING, Professor of Geography, University of Oxford 'Jason is able to personalise the global and swarm the mind in the way that insects used to in abundance but soon shan't unless we are able to heed his beautifully rendered warning.' RUSSELL BRAND 'Jason Hickel shows that recovering the commons and decolonizing nature, cultures, and humanity are necessary conditions for hope of a common future in our common home.' VANDANA SHIVA, author of Making Peace With the Earth 'This is a book we have all been waiting for. Jason Hickel dispels ecomodernist fantasies of green growth. Only degrowth can avoid climate breakdown. The facts are indisputable and they are in this book.' GIORGIS KALLIS, author of Degrowth 'Capitalism has robbed us of our ability to even imagine something different; Less is More gives us the ability to not only dream of another world, but also the tools by which we can make that vision real.' ASAD REHMAN, director of War on Want 'One of the most important books I have read ... does something extremely rare: it outlines a clear path to a sustainable future for all.' RAOUL MARTINEZ, author of Creating Freedom 'Jason Hickel takes us on a profound journey through the last 500 years of capitalism and into the current crisis of ecological collapse. Less is More is required reading for anyone interested in what it means to live in the Anthropocene, and what we can do about it.' ALNOOR LADHA, co-founder of The Rules 'Excellent analysis...This book explores not only the systemic flaws but the deeply cultural beliefs that need to be uprooted and replaced.' ADELE WALTON

Spreadsheet Exercises in Ecology and Evolution Therese Marie Donovan, Charles Woodson Welden, 2002 The exercises in this unique book allow students to use spreadsheet programs such as Microsoft Excel to create working population models. The book contains basic spreadsheet exercises that explicate the concepts of statistical distributions, hypothesis testing and power, sampling techniques, and Leslie matrices. It contains exercises for modeling such crucial factors as population growth, life histories, reproductive success, demographic stochasticity, Hardy-Weinberg equilibrium, metapopulation dynamics, predator-prey interactions (Lotka-Volterra models), and many others. Building models using these exercises gives students hands-on information about what parameters are important in each model, how different parameters relate to each other, and how changing the parameters affects outcomes. The mystery of the mathematics dissolves as the spreadsheets produce tangible graphic results. Each exercise grew from hands-on use in the authors' classrooms. Each begins with a list of

objectives, background information that includes standard mathematical formulae, and annotated step-by-step instructions for using this information to create a working model. Students then examine how changing the parameters affects model outcomes and, through a set of guided questions, are challenged to develop their models further. In the process, they become proficient with many of the functions available on spreadsheet programs and learn to write and use complex but useful macros. Spreadsheet Exercises in Ecology and Evolution can be used independently as the basis of a course in quantitative ecology and its applications or as an invaluable supplement to undergraduate textbooks in ecology, population biology, evolution, and population genetics.

IFIS Dictionary of Food Science and Technology International Food Information Service, 2009-05-18 “When comparing this dictionary, there is very little competition at all... a very useful resource in the industrial, professional and supporting research areas, as well as for non-food scientists who have supervisory and management responsibility in a food area.” -Food & Beverage Reporter, Nov/Dec 2009 “I would thoroughly recommend this book to food scientists and technologists throughout the universities, research establishments and food and pharmaceutical companies. Librarians in all such establishments should ensure that they have copies on their shelves.” -International Journal of Dairy Technology, November 2009 “A must-own.” -Food Industry News, August 2009 IFIS has been producing quality comprehensive information for the world’s food science, food technology and nutrition community since its foundation in 1968 and, through its production of FSTA - Food Science and Technology Abstracts, has earned a worldwide reputation for excellence. Disease in Wild Animals Gary A. Wobeser, 2007-04-03 Gary Wobeser's successful book from 1994 has been completely updated and enlarged in a new second edition. An in-depth overview of the available techniques for the investigation and management of disease in free-ranging animals is provided. The subjects are illustrated with examples drawn from around

the world, with emphasis on the special requirements involved in working with wild animals. The book draws on the author's training as a wildlife biologist.

Urban and Community Forestry in the Northeast John E. Kuser, 2006-11-14 During the latter part of 2004, Helen Buitenkamp of Springer Publishing emailed me that the first edition of Handbook of Urban and Community Forestry in the Northeast is the best volume in its field and inquired whether we'd be interested in compiling a second edition; I replied that we certainly would, and started working on it immediately. We have revised 14 out of 26 chapters in the first edition, and added two new authors. Many things in urban forestry have changed a great deal, while others have not changed at all. Henry Gerhold has written an entirely new Chapter 1 based on a book that he and his graduate student Stacy Franks have written entitled "Our Heritage of Community Trees." Dave Nowak has included the most up-to-date information on the environmental effects of trees in Chapter 2, and Peter Fengler and Tom Smiley have done the same with the diagnosis and treatment of hazard trees in Chapter 17. All told, we have revised or replaced 16 chapters of the original 26; we've kept 10 chapters as originally written, and substituted two entirely new chapters, 1 and 14, respectively. With the emergence of urban and community forestry as the fastest growing part of our profession in the last several years, the need for a book such as this inevitably developed. The Society of American Foresters' urban forestry working group counts over 40 universities now offering courses in this subject, and the number is growing.

The Wolves of Isle Royale L. David Mech, 2002-09-01 Mech's landmark study of wolves and moose on Isle Royale National Park on Lake Superior. The author lived among them during the three-years of his research. Isle Royale is an isolated wilderness ecosystem which is perfect for scientific study. Dr. L. David Mech is the best-known and most highly regarded wolf researcher in the world. He works with the Biological Services Division, U.S. Geological Survey, and is also the author of several other books on wolves. He has studied wolves and their prey full-time since 1958, except for a four-year period when he studied radio-tracking. During this record-long career as a wolf biologist, he has published numerous books and articles; this book was originally published by the National Park Service in 1966. Mech is the foremost expert on wolves in this country, possibly in the world, hands down. - Smithsonian magazine

Conservation Biology for All Navjot S. Sodhi, Paul R. Ehrlich, 2010-01-07 Conservation Biology for All provides cutting-edge but basic conservation science to a global readership. A series of authoritative chapters have been written by the top

names in conservation biology with the principal aim of disseminating cutting-edge conservation knowledge as widely as possible. Important topics such as balancing conservation and human needs, climate change, conservation planning, designing and analyzing conservation research, ecosystem services, endangered species management, extinctions, fire, habitat loss, and invasive species are covered. Numerous textboxes describing additional relevant material or case studies are also included. The global biodiversity crisis is now unstoppable; what can be saved in the developing world will require an educated constituency in both the developing and developed world. Habitat loss is particularly acute in developing countries, which is of special concern because it tends to be these locations where the greatest species diversity and richest centres of endemism are to be found. Sadly, developing world conservation scientists have found it difficult to access an authoritative textbook, which is particularly ironic since it is these countries where the potential benefits of knowledge application are greatest. There is now an urgent need to educate the next generation of scientists in developing countries, so that they are in a better position to protect their natural resources.
